

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

ANNUAL MESSAGE

OF THE

MAYOR

TO

The City Council,

DELIVERED APRIL 21ST. 1884.

HON. JOHN H. FARLEY, MAYOR.

MAYOR'S ANNUAL MESSAGE.

To the Honorable City Council:

GENTLEMEN:—In compliance with the provisions of section 1750 of the Revised Statutes, I respectfully submit the following message: It is of interest to our citizens, as it is their right, to be informed, at least annually, of what has transpired during the year. With this in view the law of the State and city wisely provides that each department shall make annual, and in some cases quarterly reports. Such being the fact, it is not necessary to repeat and rehash, in this report, extensive statistics and tables on matters over which the Mayor has no control.

The financial affairs of the city are almost exclusively under the control of the Council. The result of this management you will find in detail in the report of the Auditor and detailed reports of the various boards. In this connection I desire again to call your attention to my recommendation of last spring, and in which you concurred. I refer to the matter of bringing the Water Works and Cemetery boards under the same Council control as the other boards of the city. This is especially necessary in order that the Auditor's department can make an independent and complete showing of all city affairs and the city treasury be the final depository of the city funds. No better demonstration of the necessity and propriety of this can be given than to cite to you the peculations and embezzlements that have

just been unearthed in the management of one of the West Side cemeteries. The bill recommended to the Legislature by your honorable body on this subject was exceedingly commendable, but, failing to obtain the support of Senators from this county, did not become a law. Renewed efforts, however, should be made in this direction next winter.

Another matter pertaining to finance which should receive careful and prompt attention is the long standing practice of paying and carrying over-drafts on account of failure in collections for special improvements (such as Bond street, Payne avenue and other instances,) by using funds raised for other purposes, as the Treasurer, by force of circumstances, has been compelled to do, until the amount so over-drawn at present is \$146,180.25 in direct violation of the statutes. It is true that this method may save the interest on the bonds, that would otherwise be required; but it is also true that this method is not in the line of good business procedure, and liable to result in serious complications. The only argument in favor of a continuance of the practice must be based on the ground that while there are funds in the treasury unused they might thus be converted to public benefit. But the proper and only good business method of converting the use of public funds to the city's benefit is to secure an amendment of the laws requiring the city funds to be deposited in not less than three national banks of the city, under the supervision of the Treasurer, Auditor and the Council Committee on Finance, and the general fund credited with the same. This would yield the city a handsome return. As the term of the present Treasurer will expire next spring, hence doing away with any ground of complaint about interfering with the emoluments of an office already filled, I hope your honorable body will make every possible effort to obtain such legislation at the next session of the General Assembly as will permit the adoption of this course, a course now pursued in Cincinnati, giving general satisfaction and resulting in profit to the city.

As stated in my inaugural address, Cleveland, owing to its vast area as compared to its population, is necessarily a very expensive city to manage. The rapidity of its growth is marvelous. The first police census taken in 1880 showed a population of 158,207, and the last, taken in 1884, 200,429, an increase of over 42,000 in four years. This growth, increasing in geometrical progression, barring unforeseen calamities, must convince us that our city is destined in a very few years to be the great city of Ohio. You should therefore base your calculations on this future growth, and construct your improvements accordingly; failing so to do, great loss will be sustained by the city. It also behooves your honorable body and every citizen who is interested in the city's prosperity to put no obstacle in the way of progress, and to aid her development with all consistent propriety. Necessarily, many things are yet somewhat village like, and our people are slow about paving, sewerage and improving streets. All reasonable encouragement should be extended by loaning the public credit to enable the people to keep pace with the times. The theory that no special improvement should be made until the money is in the Treasury can easily be run to extremes and made a hardship to the people and a check to healthy development. The idea of requiring the people to advance payments from one to three years before they get anything in return, is, to say the least, vexatious, and a means of keeping back many improvements which are necessary to public convenience. The only danger in loaning the public credit for special improvements is in deviating from and disregarding the necessary legal procedure in carrying out to the letter the preliminaries prescribed by the statutes. One feature of the present law that seriously conflicts with thus aiding the people to improve their property, is the provision that prevents the levy for improvements to be greater than twenty-five per cent. of the *duplicate* value of the property. This should be amended so as to read twenty-five per cent. of the value of the prop-

erty *after the improvement shall be made.* This inability prevents the construction of many very necessary improvements, such as paving Canal street from Ontario street to Commercial street, Independence street, Fairmount street, and many others that are sadly in need of improvement, and also compels a heavy annual expense to the general fund to keep such thoroughfares in any kind of passable condition for the business and traffic that is absolutely necessary. In fact, the locality that is the greatest eye sore by reason of being unimproved, and stands most in the way of general improvement is the property on the duplicate at such rate of valuation as to be a complete bar to further advancement because of this twenty-five per cent. limit. I hope, therefore, your honorable body will use all fair means to procure an amendment to this law at the next session of the General Assembly.

Another matter of local taxation that demands careful attention is the present method of taxation for district sewers. Under the present laws all personal and real property in a district is taxed at a common rate. Now it is quite plain that the use of a sewer is limited to the drainage of a certain territory, and this use is not augmented nor diminished by reason of improvements. The present method of levying the tax is unjust and a hardship to improvements and personal property. For instance, a citizen who owns a lot valued on the duplicate at a given amount, builds thereon a house, which increases the duplicate one thousand dollars. He then has to pay a district sewer tax to the extent of the addition caused by the improvement and the balance of the district, including unimproved lands, is taxed to that extent less. Thus every man, be he rich or poor, who improves, is compelled to pay more, and those who do not improve, less, the original use and benefit remaining the same. This certainly is as unjust as it is unwise, and tends to check improvement and drive business from within the limits of the city. It should be corrected. Perhaps

the most equitable manner would be to tax the district according to the number of square feet of land within the same. This matter should be carefully considered, so that whatever change should be desired can be brought to the attention of the General Assembly early in its next session and it is to be hoped that a fair, equitable and just system of sewer district taxation will then be devised.

Another subject on the matter of taxation to which I called your attention in April last year, is the method of listing the property of railroads. Section 2 of article 12 of the Constitution says: "Laws shall be passed taxing by a uniform rule." And section 4 of article 13 reads as follows: "The property of corporations now existing or hereafter created, shall forever be subject to taxation the same as the property of individuals." Now, if these provisions of the constitution mean anything, they mean that railroad property and rights of way through the city cannot be taxed by the mile nor averaged with rural property. I recommend that you use your efforts with the County Auditor to get the railroad property in this city and county placed on the duplicate just as other property is valued. If these corporations resist in the matter, the laws that have been passed in the interest of the roads should be brought up for consideration and decision of the Supreme Court of the State. There can be no doubt of the verdict. There can be no more right in this averaging railroad property by the mile than there would be in averaging personal property by the pound.

Either the duplicate must rapidly increase or authority be obtained from the Legislature to increase our municipal levy; otherwise our indebtedness, which was on January 1st, 1884, including temporary loans, \$7,051,361.62, must be increased by further loans. We have to-day scarcely enough money in the street intersection fund to complete the paving of the intersections on Willson avenue. This fund was exhausted last year long before its close, and the

funds of this year had to be anticipated to pay for the paving of the intersections of Scovill avenue, which street was paved by the Brooklyn Street Railway Company. The people certainly will not desire to hinder the paving of the streets by the property holders by failure on the part of the public to provide for intersections, and there should be no trepidation on your part by reason of incurring debt on this account. There is no sense in a policy that will stop necessary improvements. The matter of improvements is one that deserves most careful attention. So far as possible let every improvement be of the most substantial character and capacity. Then your investments will surely result in future profit. In this connection the subject of paving has become of general interest. The kind of stone necessary for pavements on crowded business thoroughfares is quite expensive and likely to become more so in the near future. It seems to me that many side streets, alleys, and particularly the gutters on hill sides that are constantly being washed out by rains and consequently expensive to the general fund for box gutters, etc., could be paved to great advantage with domestic stone. This subject should be carefully considered. The general fund could and should be spared the expense of these washouts on streets that have a steep grade, by paving the gutters at the expense of the abutting property in the same manner provided for other improvements.

A new system of street cleaning is about to be tried, viz.: sweeping the paved streets. This, I believe, is the only true solution of the street cleaning problem, and I feel assured that after once put in practice it will be entirely satisfactory. Of course it will cost more, but the pleasure our citizens will derive from it will more than compensate for the slight difference in cost; and besides, it will be an inducement for property owners to pave their streets. About the only difference under the old method of cleaning, between a dirt street and a paved one, is the depth of the mud.

Among the improvements that deserve special attention is the river. Owing to the spread of business in what is known as the Upper River territory, and in order that parties locating important business concerns in that locality may be enabled to carry on their business it is imperative that improvement in the channel be made this summer. A few of the most acute bends, such as the one just above the weigh lock and another near Jefferson street, should be removed by dredging a new channel. The island near Hempy's mill should also be removed. These obstructions contribute, in a large degree, to the danger of disastrous floods by hindering the flow of ice during freshets and arresting the earth and sediment coming from up the stream during the summer season, which finds its way into the channel in the spring, thereby causing the expense of dredging that might to some extent be avoided. This work of improving the river cannot be done from the ordinary dredging fund of this year, owing to its insufficiency, but should be provided for, if possible, by special levy and loan. In this connection I call your attention to the necessity for an ordinance to regulate the dumping of materials of all kinds in the lake. The United States engineer at this point has made just complaint many times during the past few years against dumping at any point west of Erie street. The city can, of course, by contract, regulate the dumping so far as it relates to city work; but there is always more or less private dredging done, which should be fully governed, if possible, by an ordinance regulating dredging and dumping. A great and necessary improvement, one that was recommended by my predecessor—the sewerage of Walworth Run—should be commenced this year, and, if practicable, finished up to the point to which the right of way has been secured. The contemplated bridge across the river at some point near the foot of South Water street should be located and pushed to completion. In the construction of this bridge the central pier should, if consistent with the author-

ity granted, be placed on the shore on the convex side of the stream, to avoid obstructing the channel. A new pier and other improvements to Main street bridge are imperatively necessary and should be made with as little delay as possible. The Viaduct should have a new deck, and the pavement and walks on the eastern approach reconstructed this summer, and all the bridges in the city should be repaired and painted. These improvements and repairs will be quite expensive, but the property is valuable and must be kept up and preserved from the ravages of the weather.

The proposed high level bridge across Kingsbury Run has consumed considerable attention during the year past, and a location has been finally decided upon. If, in your judgment, this improvement is necessary at the present time, it should be at once pushed to completion, the present cost of material being favorable to that end. There can be no doubt that its construction would be as much of a convenience between the district intercepted by the run and the heart of the city as the present Viaduct between the East and West Sides.

The new market ground project is another important proposed improvement. About the only argument that can be made against this market improvement must rest upon the propriety of the municipality engaging in a business of that character, and the renting of spaces for conducting such business as is usually carried on in markets in competition with private property in different parts of the city already used and applicable to such use. To offset this the convenience to the greater number of citizens is the only gauge by which the propriety can be determined. If you can satisfy yourselves on this point and the conclusion is favorable to public markets, then the matter should be pressed forward, on such a scale, however, as to be commodious enough for a city of 400,000 souls, a population this city will probably reach in thirty years hence. The territory most applicable by reason of street car communication and

contiguity to the valuable market property already owned by the city is the block of property bounded by Bolivar, Erie, Eagle streets and Central Place, and the entire block would not be too large for such a market as *should* be built provided the city engages in the enterprise. This any one must concede who is at all familiar with the already overcrowded condition of the present market. Of one thing you can rest assured, property will never be acquired for this purpose at a less price than now, nor can it be expected to obtain property more applicable or better situated at any future time. This subject of markets prompts me to again call your attention to the unjust tax that is put on poverty by the provisions of sections 680 and 681 of the Revised Ordinances, which require, for a first class license, \$35 per year, or \$20 for six months, and for a second class license, \$15 per year, or \$10 for six months; thus making people who are too poor to advance the necessary amount for a year, pay \$5 more for a year because of their inability to pay the whole amount at once. This arrangement was probably intended to protect those who followed the business for a year against those who engaged in it for a shorter period. This, however, could be accomplished by so amending the ordinance as to allow the issuing of a license for the second six months on payment of a sufficient additional amount to equal the rate per year. I hope your honorable body will concede the fairness of this proposition.

Another injustice practiced by one of our city departments is the present method of meter rates as charged by the Water Works Department. Any consumer using up to 50,000 cubic feet, meter measure, is charged at the rate of one mill per cubic foot. From this minimum the rate is graded down to only one half mill for consumers using any amount exceeding 400,000 cubic feet. This way of measuring one's rights to the use of public rights by the amount of his wealth or extent of his enterprise is unfair and undemocratic. Every citizen has the same right and should

be charged for what he consumes, at the same rate, to the extent of his consumption. There is no right or justice in compelling persons who use less to contribute toward the support of those who are more fortunate and use more. I hope your honorable body will memorialize the Trustees of Water Works on this subject. Another matter connected with the Water Works Department, to which I desire to call attention is the great economy that would occur in the future by a more plentiful supply of fire hydrants. One of the most expensive items connected with our system of extinguishing fires is hose. The first cost of this article is great, and its life short. A great saving on hose could be made if fire "plugs" or hydrants were placed in greater numbers on the line of water pipe. They should be as close as one hundred feet apart, alternating from side to side of the street, in the business part of the city, and in no case further than two hundred feet distant from each other. Once placed the expense is about complete, and they will be found much cheaper than hose, besides being more convenient.

The smoke nuisance, from which the city has suffered considerably, is in a fair way of being abated. The inspector appointed during the past summer has accomplished much. The good results produced from the labors of that officer, without creating embarrassment to those doing business, make him deserving of special commendation.

Your attention is called to the danger that threatens from the promiscuous use of wire about the city for the purpose of conveying electric force for lighting. That these wires are dangerous now there can be no doubt. That the dangers will increase as the wires and insulators are exposed to the ravages of time by decay is certain. Steps should immediately be taken to prevent the placing of these wires in any position where they can form a cross or connection with any other conducting substance.

In reference to police affairs I wish briefly to direct your

attention to a recent change in the control of the force. Some months ago the Board of Police Commissioners adopted a measure placing, for the first time in many years, the management of the force entirely under the control of the Superintendent, thereby breaking up the old standing and vicious method of interference with the men of the force by the Commissioners as individuals, which I am pleased to state has resulted in a great benefit to the department and citizens. It is to be hoped that this salutary rule will be allowed to stand by our successors without interruption.

The Infirmary Department, I am proud to say, has been better managed during the past year than perhaps ever before in the history of the city. The change from an elective to an appointive board has resulted in evident benefits to the department and city, and demonstrates the wisdom of having positions requiring fitness for peculiar service appointive rather than elective. This department has felt the rapid growth of the city perhaps more than any other. But a few years ago additions were built at an expense of \$60,000 which were supposed to afford ample accommodation for many years. The great increase in population, however, coupled with the business depression of past years has crowded the department in all its branches to the utmost limit. The Directors made faithful efforts to secure the passage of a bill introduced by Mr. Burnett in the General Assembly at its recent session, which would have afforded the necessary relief, but without success. This bill contemplated a transfer from the large surplus now in the hands of the county authorities to the credit of the poor fund; an amount sufficient to enable the Trustees to make the required additions to the Infirmary. The amount so sought to be transferred was a *portion* of the funds *raised in the city* by the "Scott Law" and credited to the County Poor Fund, and for which the county has no use; that is, no use for poor purposes. This provision of the Scott law, which gave

this money to the county, is a general provision, enacted, I have no doubt, on the supposition that our county, like every other county in the state, had a county infirmary. The bill passed the House, but on account of the determined efforts of the county authorities, who desire to use this poor fund surplus to rebuild the county Court House, the bill was held back by the committee having it under consideration and did not become a law. Had the Senators from this county lent their aid instead of opposition, it would have been a law, and our Infirmary Directors would have been enabled to make suitable arrangements for the care of the poor and insane. The probabilities are that you will be called upon to borrow, perhaps, \$30,000 or \$40,000 for this department, the needs of which are so pressing and its character such as to prove commendable to every one possessing sympathetic feeling for suffering humanity.

I understand that the Assembly recently passed a law authorizing the city to procure hospital accommodations for the sick poor at the different hospitals of the city, but not having a certified copy of the Act at hand, I will defer the subject for future communication.

The bequest of the late A. A. Henderson to the city, on the basis of the compromise which was effected, will yield the city \$55,000. This money, according to the wishes of Mr. Henderson, is to be used for the purpose of industrial education of homeless youth. I would recommend that this be accomplished by arranging with the Workhouse Directors for the purchase of a farm somewhere convenient to the city, to take the place of the Refuge Department of that institution.

One important matter with which I desire to impress you, and one that I hope you will not lose sight of during your respective terms, is, that you exercise great care and caution in granting rights to corporations enjoying special privileges. I trust you will enact ordinances of that character in the form of contracts with the grantees and surround

them as much as possible with such safeguards as will enable the city to exercise all necessary control, with full power to enforce the provisions thereof.

In conclusion, gentlemen, allow me to offer you my congratulations in assuming the honors and important duties that now surround you as Trustees of the city of Cleveland. The interests of this large city are in your hands, a city soon to become the most important in Ohio, and even now looked upon as one of the most rapidly advancing and prosperous throughout the United States. We are to be congratulated that our business and growth and material interests have not been retarded nor injured by the calamities that are incident to floods or the devastations of the elements. Cleveland shows every prospect of increase and progress. In your deliberations in this Council you will be called upon to exercise your highest qualities, and I trust your judgment, wisdom and discretion during the coming year, will result in the most satisfactory administration of the affairs of your honorable body, so as to reflect credit upon yourselves and meet with favor at the hands of our citizens.

JOHN H. FARLEY.

ANNUAL REPORT
OF THE
CITY AUDITOR
OF THE
CITY OF CLEVELAND,
FOR THE YEAR ENDING DECEMBER 31, 1883.

THE
JOURNAL
OF
THE
ROYAL ANTHROPOLOGICAL INSTITUTE
OF GREAT BRITAIN AND IRELAND
VOLUME 100 PART 1 2000

REPORT OF THE CITY AUDITOR.

CLEVELAND, O., January 7, 1884.

To the Honorable City Council:

GENTLEMEN:—I herewith submit the annual statement of the accounts and finances of the City of Cleveland for the year 1883, embraced in tables numbered from one to eighteen, inclusive, and showing as follows :

TABLE 1.—A general exhibit of resources and disbursements for 1883, in account with the Ex-City Treasurer and the present incumbent.

TABLE 2.—An analysis of resources and disbursements of each general fund for 1883.

TABLE 3.—A comparison of ordinary expenses of each department and fund, paid by ordinance for 1882 and 1883.

TABLE 4.—The condition of each fund and account, January 1, 1884.

TABLE 5.—Amount, maturity and proceeds of all bonds issued in 1883.

TABLE 6.—Amount and maturity of general bonds outstanding January 1, 1884.

TABLE 7.—Amount and maturity of street improvement bonds outstanding January 1, 1884.

TABLE 8.—Amount and maturity of street damage bonds outstanding January 1, 1884.

TABLE 9.—Amount and maturity of sewer bonds outstanding January 1, 1884.

TABLE 10.—Recapitulation of bonds outstanding January 1, 1884.

TABLE 11.—Temporary loans unpaid January 1, 1884.

TABLE 12.—Comparison of city debt of all kinds January 1, 1883 and 1884.

TABLE 13.—Principal and interest of bonds and notes maturing in each month of 1884.

TABLE 14.—A comparative showing of items included, for thirteen years—1871 to 1883 inclusive.

TABLE 15.—The municipal levy for each general fund in the tax of 1883, and comparison with that of 1882.

TABLE 16.—Amounts levied in the tax of 1883 upon sewer districts.

TABLE 17.—List of assessments prepared by the City Auditor's department and levied in the tax of 1883.

TABLE 18.—Results in 1883.

In submitting this my SIXTH annual statement I call attention to Table 18, showing among other things:

First—That notwithstanding the issue of bonds to extend the water works and to build sewers, as shown in Table 5, the total city debt has been reduced by \$68,851.94.

Second—That notwithstanding the payment from the Sinking Fund of 1862 of \$104,913.71 toward the cost of paving, and the cancellation of \$40,000 of maturing bonds held by said fund, the total of all sinking funds has increased by \$2,201.41.

Third—That the city has paid in 1883 \$711,407.11 for permanent improvements, as shown in Tables 1 and 2.

I desire also to submit the following table of items showing results for six years past.

RESULTS IN SIX YEARS FROM 1878 TO 1883, INCLUSIVE.

	Dec. 31, 1878.	Dec. 31, 1883.	Reduction.
General bonds outstanding.....	\$6,678,000 00	\$5,962,000 00	\$696,000 00
Special bonds, notes and overdrafts	2,844,087 85	1,069,861 62	1,774,676 23

Total.....	\$ 2,223,841 49
Increase of taxable valuation from 1878 to 1883.....	\$14,850,321 00

RATE OF CITY TAX.

The upward tendency of the rate of taxation demands the serious attention of the City Council, and of tax paying citizens generally.

Improvements in streets and the building of sewers must go on, and local taxation for these must be levied more or less every year, and if, in addition to these local taxes, the general tax rate be high, hardship must result to many citizens. At the same time, a high rate of general tax is a most effectual check upon the investment of capital in the city.

Every reasonable and lawful means should be employed to prevent a high rate of general tax. Among such means it seems to me are the following:

First. Expenditures from every fund should be prudent. Except in cases of clear emergency, every board should not only keep within the resources lawfully provided for the current year, but should not greatly exceed the average expenditures of recent years. And the providing of any surplus or grab-bag fund to which the various boards could resort upon having exhausted their legitimate resources, would not only violate the spirit of existing statutes, but be opposed to the best public policy.

Second. Effective steps should be taken, and followed up, to enlist all descriptions of personal property on the tax duplicate as completely as real property is enlisted.

Third. Parties using the public highways for individual profit, as street railroad, gas, telephone, telegraph, electric and other companies, should be required to pay adequate sums into the City Treasury to relieve the expense of keeping the streets in order.

Fourth. A comprehensive system of licenses, similar to that enacted for Cincinnati by the last legislature, should be enacted for Cleveland. All persons making extraordinary use of public property, or requiring extra municipal service or protection, should be required to make extra tribute toward municipal expenses.

Not till all these sources of revenue are brought into service, will the burden of municipal expense be equitably borne.

TABLE No. 1.
A GENERAL EXHIBIT OF RESOURCES AND DISBURSEMENTS
OF 1883 IN ACCOUNT WITH THE EX-CITY TREASURER
AND THE PRESENT INCUMBENT.

RESOURCES.	Amounts received by S. T. Everett, Treas. from Jan. 1, 1883, to April 16, 1883.	Amounts received by Thos. Ax- worthy, Treas. from April 16, 1883, to Jan. 1, 1884

ANNUAL REPORT
OF THE
CITY CLERK,
TO
THE CITY COUNCIL OF CLEVELAND,
FOR THE YEAR 1883.

CITY CLERK'S REPORT.

To the Honorable City Council:

GENTLEMEN: — Herewith I have the honor of submitting the annual report of this department for the year ending December 31st, 1883.

LICENSES.

There were issued during the year 7,357 licenses, for which \$17,543.58 was received and paid into the city treasury, to the credit of the following funds:	
General fund.....	\$ 4,210 75
Infirmary fund.....	6,990 83
Police fund.....	5,189 00
Street fund.....	1,038 00
Armory fund.....	115 00
Total.....	\$17,543 58

The table hereto appended is a full exhibit of the number of licenses issued and the amounts received in each class and during each month.

CITY CLERK'S REPORT.

PRINTING, STATIONERY, &c.
 The following table shows the cost of Blank Books, Printing, Stationery, etc., furnished the different departments of the city during the year 1883.

DEPARTMENTS.	Blank Books.	Printing.	Papers and Envelopes.	Stationery Sundries.	Lithographing.	Engineer's Supplies.	Totals.
Mayor.....	\$ 2 15	\$ 4 10	\$ 4 00	\$ 4 65	\$ 14 90

ADVERTISING.

The system of having official advertising done in English, German and Bohemian papers has proven most satisfactory. Not only has it given the different nationalities every opportunity to become thoroughly conversant with the city's transactions, but the cost has actually been reduced from that of previous years. The following report shows the cost of advertising charged to the departments during the year:

DEPARTMENTS.	Amount.
Mayor.....	\$ 289 33
Board of Improvements.....	1,934 74
Fire Department.....	56 50
Police Department.....	17 50
Board of Workhouse Directors.....	8 59
Board of Infirmary Directors.....	66 39
Water Works.....	168 63
City Auditor.....	217 44
City Clerk.....	5,553 14
City Solicitor.....	5 94
City Civil Engineer.....	489 61
Board of Health.....	54 45
Board of Cemetery Trustees.....	37 15
Markets.....	6 02
Total.....	\$8,885 43

THE LICENSE SYSTEM.

Although the revenues received by the city during the past year, under the existing license ordinances were considerably greater than during any previous year, the results are far from being satisfactory. The fact is all too apparent that Cleveland has the worst license system of any large city in the country. It would appear that the principle sought to be carried out by it is that certain vocations among the poorer classes alone need regulating. It is a ridiculously inconsistent system, without even the semblance of justice. I sincerely trust that your honorable body will set about to provide the remedy, which rests in the establishment of an entirely new system. Permit me, therefore, to offer the following suggestions:

All licenses should be issued yearly, and for the expiration and renewal of licenses of each class a certain date should be fixed.

For licenses issued during the year a pro rata fee should be charged.

Telegraph, telephone and electric light companies, who locate their poles and stretch their wires along the streets of the city; gas companies who use the streets as the receptacle for their pipe lines; street railroads which mutilate the roadbeds; plumbers, etc., who tear up pavements and bury their pipes in the streets, should all be required to pay to the city proportionate fees for the above privileges.

Street railroad companies should be required to place a car license in a conspicuous place in each car operated. This will ensure a strict observance of the ordinance. By actual investigation last summer, I found that dozens of cars were operated without a license.

I would further recommend that the fees of peddlers of the first and second classes, and of draymen and expressmen be lowered, and that a higher fee be imposed upon theaters, cir-

cuses, museums, concerts, and other performances for gain, and upon pawn-brokers.

Finally, that the conduct or operation of all the following, be licensed:

Dancing halls, bowling alleys, billiard and pool tables, bill posters, shooting galleries, junk dealers, pleasure boats let out for hire, runners for hotels, etc., auctioneers, brokers, side-shows of circuses, transient traders, book agents, and several other classes that might be enumerated.

To adopt this system would be merely an act of justice to those who now pay annual fees. It would carry out the principle of regulation, and not of extortion, as appears to have become the popular idea with many persons in charge of public administration elsewhere. It would, furthermore, lessen the burden of taxation which is so heavily weighing upon the worthy middle and poorer classes.

Respectfully submitted,

CHAS. P. SALEN, *City Clerk.*

ANNUAL REPORT

OF THE

BOARD OF IMPROVEMENTS

TO

THE CITY COUNCIL OF CLEVELAND,

FOR THE YEAR 1883.

REPORT OF BOARD OF IMPROVEMENTS.

To the Honorable City Council:

GENTLEMEN:—The Board of Improvements respectfully submits its annual report for the year ending December 31, 1883, containing the different amounts of expenditures for work done under this department during the past year, not included in the reports of the City Civil Engineer and Street Commissioner.

The reports last mentioned give a particular account of all city work done and improvements made by contract under the supervision of this Board, and are submitted herewith, to be considered in connection with and as a part of the report of this department of the city government.

There are no contracts now unperformed which cannot presumably be completed before this Board's successor shall be organized, with the exception of the Broadway main sewer, which could scarcely be completed in one season, and the Board recommends that, so far as possible, contracts should not be entered into near the close of a term of this body, and that all contracts made by the Board should be completed, if practicable, during its life, as the inheritance of contracts by one Board from another must naturally lead to considerable embarrassment.

An examination of the Street Commissioner's report will show the sums disbursed for under his superintendence. The

unpaved streets have been greatly improved, many of which have, during the past summer and fall, been cleaned, or, more properly speaking, repaired, which had received no attention for several years prior to that time. The Board is of the opinion that, with few exceptions, stone should be the material used for pavement, and that such streets should be cleaned by a process of sweeping. The method hitherto practiced, of cleaning paved streets by the mile under contracts for a year is very imperfect, and consequently very expensive. At the present session of the General Assembly of the State, a statute has been enacted authorizing the Board to contract for cleaning paved streets by districts for a term of not less than one nor more than three years. Under this method the work on the unpaved streets will be done by labor engaged by the day, under the direction of the Street Commissioner. This, the Board thinks, will be an improvement on the old plan of cleaning the streets, both paved and unpaved.

The expenditures authorized by the Board, not set forth in the reports of the City Civil Engineer and Street Commissioner, are as follows:

ANNUAL REPORT

OF THE

CITY CIVIL ENGINEER

OF THE

CITY OF CLEVELAND,

FOR THE

YEAR ENDING DECEMBER 31, 1883.

REPORT OF THE CITY CIVIL ENGINEER.

To the Honorable Board of Improvements:

GENTLEMEN—I respectfully submit the annual report of the City Civil Engineer's Department for the year ending December 31st, 1883.

The total cost of all work done and improvements made under the direction of this department during the past year, amounts to \$582,379 55. This amount includes the cost of repairs of the city bridges, amounting to \$10,941.57, which this year have been very heavy, as the flood which occurred February 2d and 3d, 1883, caused a large amount of damage.

Two new iron bridges have been constructed, one over the canal above the Paper Mill, at the Reede farm, and one at the crossing of Upper Central Way, on the flats, on the site of the one carried away by the flood of February last. The water in the river during the flood, at this bridge, raised thirteen feet four inches above the city base of levels, and at Lower Central Way the water rose up to the level of the floor of this bridge.

The bridge carried away at Upper Central Way was a very light structure, only one hundred and forty-five feet long, with a fixed span fifty feet in length, on the southerly side of the river, with two piers in the channel of the river. The floor of the old bridge was only ten and one-half feet above the city

base of levels. The new bridge is one hundred and eighty-five feet long and the floor is sixteen feet above the city base of levels.

The high water during the flood damaged the foundations of the piers and abutments of several of the city bridges. The center pier of Main street bridge and the two abutments of Center and Columbus street bridges were undermined. The north abutment of Columbus street bridge has been rebuilt during the past year, and the others will have to be rebuilt in time.

The west abutment of Jefferson street bridge has slid or moved into the river, and the north pier and the south abutment of Seneca street bridge will both have to be rebuilt at no distant day. The wood piers of the old bridge on Swiss street will have to be rebuilt soon, unless a culvert is built and the bridge filled in with earth. The cause of all these piers and abutments failing, is, that the piles in the foundation are too short, too small, and not enough of them. When these structures were built fifteen or twenty years ago, piles were used only fifteen to twenty-five feet long. Vessels then did not draw more than ten to twelve feet of water, and the river did not have to be dredged from fourteen to sixteen feet deep as at present.

The river during the past two years has scoured out very badly under all the draw bridges. Under Main street bridge, or just above the center pier, the water was found to be twenty-seven or twenty-eight feet in depth, and under all the bridges, the water was found to be, after the flood, from twenty to twenty-four feet deep. The reason for this, is, that the center piers occupy from twenty to twenty-six feet of the river channel, and contracts or narrows up the same to that extent, and causes the sand and mud in the river bed under the bridges to be scoured out, and consequently the piles used in foundations of the abutments and piers years ago are now too short. Piles used in foundations of bridges now ought

to be forty to fifty feet long; of good size and driven from two and one-half to three feet apart from centers so as to sustain the pressure of the roadway behind them without sliding towards the river.

It is proposed to rebuild the center pier of Main street bridge during the year of 1884, and also fit up the bridge to turn by steam power.

The Viaduct and draw is in good running order. A part of the wood paving on the easterly approach will have to be renewed during the coming year.

Considerable settlement has taken place in the foundations of the piers and abutments of the arches on the west side of the river. Levels were taken on the footing courses of the piers and abutments after they were built up to the spring line, and at intervals of six, nine, and twelve months afterwards, as the work progressed until the structure was completed and the roadway paved, and since completion, up to the present time; commencing at pier 8, at the west end of the Iron Draw, and running westerly to the abutment numbered 17.

The total settlement of pier 8 from the time it was built up to the spring line, until the Viaduct was completed and opened; a period of about three years, was one and three-fourths inches, and at pier 16 the settlement was four and one-fourth inches. The settlement gradually increases from pier 8 at the draw to the west end.

Since the completion of the Viaduct in 1879 up to the present time, a period of four years, the settlement has been very light, being only about one-half inch over each pier; except in two instances, the northerly ends of piers 14 and 15 settled in one year about one inch more than the southerly ends. This unequal settlement in these two foundations has caused three of the arches, adjacent thereto, to crack longitudinally, nearly square through the centers. These cracks will not injure the structure to any great extent.

One thing is certain in building the Viaduct, from the time that the piers were up to the spring line, until it was completed, or while the load was being increased on the foundations, the same continued to settle and as soon as the Viaduct was completed and no additional load has been put on, the settlement for four years has not exceeded five-eighths of an inch. Therefore if the load had been increased by putting in solid stone backing over the arches, instead of gravel, as was put in, the foundations would have been so heavily loaded as to have caused them to have settled and cracked to such an extent as to injure the Viaduct very much and perhaps render it unsafe.

I have, during the past year, made three estimates on as many different routes for a high level bridge over Kingsbury Run, and six estimates on as many different routes for high level bridges from the East Side to the South and West Sides; also one over Walworth Run, from Crown street to Abbey street.

SEWERS.

During the year plans have been prepared for nine and seventy-six-one-hundredths miles of sewers, and six and eighty-eight one hundredths miles have been constructed at a cost of \$121,431.99. The most important of these were located in Water street, from Lake to Superior street; in Superior street, from Monumental Square to Erie street; also from Willson to Case avenues; and the District No. 15 sewers, embracing the main in East Madison avenue, from Lena to Euclid avenue, with branches in Euclid, from Giddings brook to Fairmount street, and a temporary outlet through Beecher street and Lena avenue to Dunham avenue Main Sewer. The proposed repaving of Euclid avenue, from Willson avenue to Fairmount street, made it extremely desirable that the avenue should be properly sewered before laying an expensive and durable block-stone pavement; but to have provided an outlet, by constructing a main sewer from the

lake through East Madison avenue to Euclid avenue, a distance of nearly two and one-fourth miles, would have delayed the repaving not less than two or three years.

The only practical plan for sewerage the street and at the same time preventing this delay, seemed to be, to construct that portion of the main in East Madison avenue, between Lena and Euclid avenue, with a temporary outlet through Lena and Beecher streets to Dunham avenue main. This plan met with some opposition for the reason, that, while under existing laws, the city could construct and connect the sewer in the manner proposed, there was no legal way provided, by which, to compensate District No. 7 for a use of a portion of its mains. The time consumed in obtaining this necessary legislation and taking the requisite preliminary steps for construction, delayed the beginning of work until the latter part of July. The amount of work to be done, together with the late commencement and the difficulties encountered in construction, made it utterly impossible to construct the sewer and appurtenances, allowing time for a proper settlement of the road-bed, and complete the paving the past season. With the exception of connections and branches at intersecting streets between East Madison avenue and Brookfield street, the sewer in Euclid avenue is now finished as far east as Fairmount street, and the work of repaving can be carried on to completion as soon as the weather becomes favorable. The main in East Madison avenue and the outlet in Beecher street and Lena avenue will be finished about May 1st, 1884.

DREDGING.

A large amount of dredging has been done and the channel has been kept in fair condition during the season of navigation. During the flood of last February, bars formed at many places in the river which had to be removed, and more dredging would have been done but for the lack of funds. The high water in the lake and river during the season 1882

has continued through 1883, the water being as much as one foot higher than the ordinary stage. The prevalence of North-east winds I think is the cause of the high water. A vessel loaded with iron ore, drawing fifteen and one-half feet of water, passed up the river to the lower blast furnaces this year.

PAVEMENTS.

There has been five and five hundred and seventy-five one-thousandths miles of streets paved with Medina stone during the past year; of this two and one hundred and sixty-six one-thousandths miles have been laid with dressed block stone, and two streets on which a tax has been levied for a common stone pavement, have been changed and an additional tax has been levied for a block stone pavement; thus showing that this kind of pavement is growing in the estimation of the public, even if it does cost one-third more.

SURVEYS, Etc.

A first-class contour map should be made of the entire city and be properly mounted on rollers in the office of the City Civil Engineer.

Of surveys made in 1883, that of the Kingsbury Run bridge route may be specially mentioned. The entire center line as finally fixed upon having been accurately measured and staked out from Davies to Jackson street. Over one hundred and fifty buildings situated along the route were located and special maps were prepared showing the exact amount of land to be taken from each property owner on the route.

Lines and levels for nearly a mile of new iron fence around Woodland Cemetery were given; also lines for new fences around the Central High and 18th Ward school lots.

Location stakes and levels for seven new school houses were given. The total surveys as shown in annexed table number thirty-one as against twenty-two in 1882.

The examination of petitions, remonstrances, etc., referred to me, has required a large amount of work, there having been represented on such papers in 1883 about 145,000 feet or twenty-eight miles of frontage, scattered over a total street frontage of over 254,000 feet, or forty-eight miles. The name of every person signed on these petitions, etc., must be compared with the county records to ascertain whether he owns the property signed for or not. It will be readily seen that this matter calls for considerable time and labor. Likewise the reporting as to whether the tax assessed for street improvements will exceed twenty-five per cent. of the taxable valuation of any of the pieces of property fronting on the improvement, or not; special taxes being limited by statute to that amount.

The work of preparing house numbering maps increased over 1882 by more than one-half, there having been seventeen and one-fourths miles of streets numbered in 1883, as against eleven and one-half miles in 1882. The maps must show the location of the front of each house and each doorway, and these must be obtained by survey. The first volume of these maps under the present ordinance has been bound and is on file.

The work of examination and reporting on all new plats of sub-divisions, etc., submitted, also increased largely over 1882, there having been thirty-one plats so reported last year as against fifteen in 1882.

Maps of about 74,000 feet, or fourteen miles of streets, showing frontages, ownerships and valuations, were made in 1883, being about the same as in 1882, viz. thirteen and one-half miles.

The record and location by wards on maps of all new street lamps has been kept. As shown by annexed table there was a total of 5,146 city street lamps January 1st, 1884, an increase of 348 since January 1st, 1883.

Another matter which has not been mentioned in previous

reports is the protection of all street monuments in street being improved. This work has been especially large in the last few years on account of the large amount of grading, paving, sewerage, etc., done. These monuments must be "referenced" by instrumental lines and afterward accurately reset to suit the grade of street. About eighty monuments were referenced in 1883, most of which have been reset, and about twenty new ones were set to mark points fixed by survey or to replace old ones.

There has been eleven assistants employed in the office during the entire year, and two assistant engineers were employed for a short time in addition to those employed on the regular force.

I cannot close without thanking your Honorable Board for the consideration you have shown me during our official intercourse, and extend through you to the City Council and other boards of the City Government my best regards for the courtesies shown to the department of which I have the honor to be the head. I also here take pleasure in commending in the highest terms the efficiency of the members of the Engineer Corps, under my charge, and thank them for the readiness they have always shown in discharging the duties assigned to them.

Very respectfully,

B. F. MORSE.

City Civil Engineer.

ANNUAL REPORT

OF THE

STREET COMMISSIONER

OF THE

CITY OF CLEVELAND,

FOR THE

YEAR ENDING DECEMBER 31, 1888.

REPORT OF THE

STREET COMMISSIONER.

To the Honorable Board of Improvements :

GENTLEMEN:—The undersigned herewith submits the annual report of the Street Department for the year ending December 31st, 1883.

The tables accompanying this report will show the different classes of work and amount done on each street. The tables will also give a detailed account of all work done on paved and unpaved streets, sewers, catch-basins, culverts, bridges and crosswalks, under charge of the Department; the lumber, stone and hardware used, also miscellaneous bills and salaries of officers.

The repairs to pavements done under the supervision of this Department have been a heavy item of expense, although a large amount has been repaid the city on account of work done for private parties who received permits to open streets.

The replacing of worn out box gutters has been to a great extent discontinued and gutters have been paved with stone, a policy which should be continued.

The outlying wards have had proper attention according to the means at the disposal of this Department; and in order to give them proper recognition this coming year the economy practised on our paved streets will have to be continued, to keep within the very limited amount appropriated to Street Fund.

This report shows the very large amount expended on repairing wood pavement, and an equally large sum will be required this year unless immediate steps are taken to replace the wood by stone pavements.

There has been considerable outlay during the year, extra expense incurred by washouts on Herschell and Scranton avenues, and building culverts on Euclid avenue and Brookfield streets. These four items alone amounted to eighteen hundred and eighty dollars. Expenses also have been incurred by laying crosswalks; although much of the stone used for this purpose was removed from other streets, having been replaced by Medina stone. This year also there will be greater expense laying crosswalks, as many sidewalks have been laid with stone, and where the property owners have complied with the ordinance, in such case made and provided, it gives them the right to require the city to complete the work by laying stone crosswalks.

The contract prices under which street cleaning and repairs have been done are as follows:

Contractor.....	M. Carroll.	A.R. Jewett	S. Be'kwith	S. Be'kwith
Section.....	1	2	3	4
Paved streets.....	\$22 00	\$30 00	\$26 00	\$28 00
Unpaved streets.....	21 00	25 00	25 00	27 00
Alleys.....	7 00	10 00	1 00	1 00
Spring cleanings.....	31 00	60 00	10 00	10 00
Com. labor.....	1 50	1 50	1 50	1 50
Team labor.....	3 50	4 00	3 50	3 50
Excavation.....	23	25	20	20
Earth filling.....	20	30	20	20
Gravel.....	33	45	50	40
Brk. stone.....	58	60	50	50
Blk. stone.....	33	25	40	30
Furnace cinder.....	40	70	40	45
Cleaning crosswalks.....	4½	4½	7	8

The catch-basins of the city were contracted for fourteen months at \$2,545.00.

The semi-monthly estimates of the market grounds were made by this Department, although paid from Market fund. The contract price was for fourteen and one-half months, \$895.00.

The streets of the city have been cleaned by contract, an unsatisfactory method, and while it may be economy to clean paved streets by contract, in the cleaning of dirt streets it is certainly a failure, as the repairs differ not only in the different streets, but in different parts of the same street. Under the circumstances no general specifications can be drawn which would render the contract system satisfactory.

The aggregate length of paved streets in the city is about 55 2-10 miles, which is a very small amount of pavement if we consider the area covered by the city limits. It would be advantageous and economical to the property owners and the public, to pave the streets in the business portion of the city.

There are about three hundred and eighty miles of unpaved streets, which claim our attention and have (as far as possible) received it, and work done thereon will compare favorably with past years. There are a number of streets the present condition of which requires attention; whether they are accepted streets or not I do not know, hence am unable to tell if it be the duty of the city to perform any work thereon.

According to the Auditor's statement the ordinary expenses of the fiscal year, 1883, were \$83,816.62, including \$3,625.95 not expended by Street Commissioner, which leaves \$80,190.67. Deducting \$1,730.16, the difference in bills of December 1882 and December, 1883, leaves \$78,460.51 add to this \$3,810.27, ten per cent. of work done by contract less \$46.09, which has been paid to contractor, a balance is had of \$82,270.78 ordinary expenses under charge of Street Commissioner. Of this amount \$9,022.72 were collected for street repairs, etc., making net expense under Street Commissioner \$73,248.06. After a careful perusal of the appended tables any unbiased judgment is that the fund of this Department has been expended

as judiciously and economically as possible, in order to do justice to the taxpayers, scattered over a territory embracing nearly four hundred and fifty miles of streets.

It is with no little satisfaction that I mention the fact that there have been no liabilities against the city, arising from negligence of the employes of this Department. The credit of this is due greatly to the efficiency of Assistant Street Commissioner William Cochran; the superintendent of paving repairs, W. A. Harvey; superintendent of catch-basins, P. W. O'Reilly, and all street superintendents and inspectors, all of whom have filled their respective positions with credit to themselves and credit to the Department. Deserving of special mention is Mr. E. L. Doran, clerk of this Department, on whose ability and assiduity, honesty and intelligence a great deal of the welfare of the Department rests; and who is at present the lowest remunerated employe of responsibility in the Street Department.

A detailed statement of all work performed will be found by referring to the following tables:

Table No. 1—Gives all work on paved streets, except filling.

" " 2—Gives Street Commissioner's work on unpaved streets.

Table No. 3—Gives work on unpaved streets by contract and filling paved streets.

Table No. 4—Gives work on sewers.

" " 5—Gives work on culverts.

" " 6—Gives work on crosswalks.

" " 7—Gives work on catch basins.

" " 8—Gives work on box gutters.

" " 9—Gives work on sheathing bridges.

" " 10—Gives work on hardware, lumber and stone accounts

Table No. 11—Gives miscellaneous bills.

" " 12—Gives salaries of officers.

" " 13—Gives summary.

" " 14—Gives inventory.

All of which is herewith respectfully submitted.

FRANK BUETTNER,

Street Commissioner.

ANNUAL REPORT

OF THE

PARK COMMISSIONERS

OF THE

CITY OF CLEVELAND,

FOR THE

YEAR ENDING DECEMBER 31, 1883.

ANNUAL REPORT

OF THE

PARK COMMISSIONERS.

To the Honorable City Council :

GENTLEMEN:—Herewith is submitted the report of the Board of Park Commissioners for the year ending December 31st, 1883.

The following is an exhibit of the receipts and disbursements for the year:

Balance on hand January 1st, 1883.....	\$ 2,529 05	
Received under the tax levy.....	12,182 38	
Received from miscellaneous sources.....	16 60	
Proceeds of loan from the Sinking Fund of 1862.....	20,000 00	
		\$34,728 03
DISBURSEMENTS.		
General account.....	11,006 47	
Wade Park Improvement.....	20,784 87	31,791 34
Balance on hand January 1st, 1884.....		2,986 69

The general account embraces all expenditures for the maintenance of the several parks, the improvements and repairs, office expenses and salary of the Superintendent and Secretary as follows:

Wade Park.....	\$ 606 25
Monumental Square.....	2,614 29
Lake View Park.....	2,753 89
Franklin Circle.....	692 69
South Side Park.....	925 44
Clinton Park.....	688 80
Miles Park.....	90 00
Office Expense.....	2,638 61
Total.....	\$11,006 47

The following items constitute the expenditures for the year on the general account.

Labor, including wages of park tenders and laborers.....	\$ 6,694 31
Repairs of walks in Monumental Square.....	606 44
Plumbing repairs.....	87 53
Plants and flowers.....	147 66
Turf.....	86 00
Painting fence Lake View Park.....	226 10
Salary of Superintendent, 11 months.....	2,291 65
Salary of Secretary.....	300 00
Office Stationery.....	46 96
Miscellaneous supplies for use in the parks.....	520 63
Total.....	\$11,006 47

Nothing in the nature of permanent improvements have been made during the past year in either of the parks, except that which has been carried forward during the summer in Wade Park.

WADE PARK.

By the terms of the deed of gift made by Mr. Wade to the city a sum not less than \$75,000 is to be expended within three years from the first day of January, 1883, for the improvement of Wade Park, and in compliance with the recommendation of the Board of Commissioners and in furtherance of the city's obligation a levy of 6-20 of a mill for the improvement of Wade Park was incorporated in the tax

ordinance, passed June 4th, 1883. The proceeds from such levy not being available until the year following, 1884, and the Board of Commissioners desiring to proceed at once with the work of improvement asked of your honorable body authority to borrow the sum of \$24,000 from the Sinking Fund of 1862, the proceeds of the loan to be used in anticipation of the levy; in compliance with the request, a resolution, introduced by Mr. Green, chairman of the committee on parks and public grounds, was adopted by the Council, June 11th, 1883, conferring the authority asked for; by virtue of this authorization loans aggregating \$20,000 have been made during the year and notes bearing interest at six per cent. per annum were given as follows:

August 1st, 1883 for \$5,000 00, payable April 1st, 1884.

Sept. 5th, 1883 for \$5,000 00, payable April 1st, 1884.

Oct. 1st, 1883 for \$2,000 00, payable April 1st, 1884.

Oct. 1st, 1883 for \$3,000 00, payable Sept. 1st, 1884.

Nov. 1st, 1883 for \$5,000 00, payable Sept. 1st 1884.

There has been expended during the year upon this important improvement the sum of \$20,734 87; the aggregate expenditure in this behalf up to the date of this report being \$21,204.87. The amount in excess of that secured by the loans referred to, viz: \$1,204.87, being paid out of the balance remaining in the Park Fund.

The plans, maps and drawings as prepared by Mr. E. O. Schwagerl for the improvement were approved by the Board of Commissioners May, 3d, 1883, and work was commenced the following July, the extent and nature of the work performed during the year is set forth in the report of the Superintendent which accompanies, and is made a part of this report.

For the purpose of carrying forward the improvement in conformity with the terms already referred to, a further levy will be asked for at the proper time, and the Board of Commissioners is well assured that your honorable body will cooperate in prosecuting the work to its final completion by voting the means requisite.

Beyond the erection of a needed Stand House in South Side Park no permanent improvements are contemplated during the coming year, and, as the parks are in most excellent condition, but a very small appropriation will be asked for beyond the usual amount required for the proper care and protection of the valuable property entrusted to this Board.

Respectfully submitted,

A. EVERETT, President.

J. H. WADE,

J. M. CURTISS,

Commissioners.

W. H. ECKMAN, Clerk.

SUPERINTENDENT'S
REPORT.

SUPERINTENDENT'S REPORT.

To the Honorable Board of Park Commissioners, of Cleveland, O.:

GENTLEMEN:—Herewith is respectfully presented a progressive plan and a brief report of work under your management during the year 1883:

The work on Wade Park was commenced July 1883 and closed on Nov. 29th, 1883.

The removal of the Deer Park, to its more healthful site demanded immediate attention, necessitating the cutting out of many large and old forest trees, most of which were more or less seriously decayed. The remaining trees were cleared of dead wood. The surface ground has been graded, fertilized and top-dressed with not less than six inches of good soil, and is now in young grass, having already afforded the animals some substantial grazing. The fence enclosing the Deer Park is 1,700 feet long and 10 feet high, built with posts obtained from the grounds. A three inch water pipe is laid to the Deer Park.

The Boulevard bounding the Wade Park, and leading from Euclid avenue to Doan street, north of the brook, is nearly 5,000 feet long and 66 feet wide, 40 feet of which forms the roadway, 16 feet lawn and 10 feet sidewalk.

The entire breadth is graded, requiring the removal of 27,600 cubic yards of earth. The road bed has been dressed with suitable clay, requiring 2,000 cubic yards of that material, and one quarter of its surface covered with gravel. The strip

of lawn has been enriched with 5,300 cubic yards of the best surface soil, to produce a speedy and luxuriant growth of the shade trees. All the adjoining Park roads have been graded at their connection with the Boulevard.

Seventeen large elms have been moved and replanted.

The remaining work done is as follows:

Roads 30 feet wide graded,	5,650 linear feet.
Park walks 8 and 10 feet wide graded,	3,300 linear feet.
Total sod edging laid	15,100 linear feet.

The above three items requiring the additional removal of 10,000 cubic yards of earth.

The Parade and Nursery grounds have been ploughed, and the former cross-ploughed.

The Lake has been partially excavated, and the gravel bank largely uncovered of earth and made accessible where the future road bed and grade will be formed by the removal of the gravel only, which at this place is of an excellent quality.

72 feet of brick sewer 18x24 inches has been built, and 1,642 feet of 8 inch water mains laid, including four 4 inch hydrants.

Throughout the grounds a large number of tree stumps have been removed, as well as the trees in the new road sites.

The following is a summary of good available timber on hand, saved from condemned trees:

White oak.....	41,000 board measure.	153 tons.
Red oak.....	16,685 " "	36 $\frac{3}{4}$ "
Chestnut.....	14,643 " "	29 $\frac{1}{4}$ "
Whitewood.....	41,338 " "	81 $\frac{1}{2}$ "
Butternut.....	estimated	20 "
White oak rustic.....	8 cords.	

Totals.....113,664 board measure, 320 $\frac{1}{2}$ tons.

The following relates to the labor employed and time occupied:

CLASSIFIED LABOR DURING 129 WORKING DAYS.

At \$1.50 per day	4,219.05 days
" 1.40 " "	2,222.15 "
" 1.25 " "	234.40 "
" 1.00 " "	196.80 "
<hr/>	
Total	6,872.40 days.
Average laborers per day	53 ³⁵ / ₁₂₉
Teams at \$3.50 per day	1,948.15
Average teams per day	15
Mechanics at \$2.75 per day	6.15

The rules and regulations approved by your Board before the commencement of the work have resulted in entire satisfaction to the management, with equal benefit to the employees.

The system of graded wages recommends itself in its workings, by stimulating labor for promotion, and compensating industry, honesty and ability.

The deep cuts and fills are practically completed, except the roads on the gravel pit, and the lake dyke separating the lake and brook.

A topographical survey and plans of improvement have been made for the South Side Park, including a set of plans for a Music and Speaker's Pavillion and tool room. Otherwise, nothing has been done on any of the minor Squares and Parks except the ordinary maintenance work, keeping them in as good condition as the amount of the maintenance fund would permit.

Respectfully submitted,

E. O. SCHWAGERL,

Supt. and Engineer.

To the Honorable City Council.

TWELFTH ANNUAL REPORT

OF THE

BOARD OF

POLICE COMMISSIONERS

OF THE

CITY OF CLEVELAND, OHIO,

FOR THE

YEAR ENDING DECEMBER 31, 1888.

ORGANIZATION.

JOHN H. FARLEY,
Mayor and President.

Commissioners:

W. H. GABRIEL,
J. H. BRADNER,
A. B. HALLIWELL,
JAMES McNEIL.

THOMAS KING, *Secretary.*
JACOB W. SCHMITT, *Superintendent.*
JAS. McMAHON, *Deputy Superintendent.*

HENRY HOEHN, *Captain.*

EXTRACT FROM REGULAR MEETING OF THE BOARD HELD JANUARY 21, 1884.

"The Secretary submitted copies of Annual Report of Police Department.

"*Ordered,* That three hundred copies of same be printed and bound."

By order of the Board,

THOMAS KING, *Secretary.*

TWELFTH ANNUAL REPORT
OF THE
BOARD OF POLICE COMMISSIONERS,
OF THE
CITY OF CLEVELAND.

OFFICE BOARD OF POLICE COMMISSIONERS, }
CLEVELAND, JAN. 1, 1884. }

To the Honorable City Council of Cleveland, O.:

The Twelfth Annual Report of the Board of Police Commissioners is respectfully submitted for the consideration of your honorable body, in compliance with an act of the General Assembly, passed March 17th, 1876, providing for the control of the Police Department of this city.

The year just closed has been a very quiet one in Police circles, little having transpired to shock the moral sense of our community, consequently, this report will be confined to records of ordinary Police transactions, and a record of all moneys received and disbursed by the Board during the year.

THE BOARD.

Since the last Report there has been one change in the *personnel* of the Board. The time of Commissioner Short having expired, the citizens at the last Spring election elected James McNeil to fill the place formerly occupied by Commissioner Short.

The Board at present is made up by the following citizens:

	Term Expires.
JOHN H. FARLEY, <i>Mayor and President</i> , - - - - -	1885.
W. H. GABRIEL, - - - - -	1884.
J. H. BRADNER, - - - - -	1885.
A. B. HALLIWELL, - - - - -	1886.
JAMES McNEIL, - - - - -	1887.
THOMAS KING, <i>Secretary</i> .	

STANDING COMMITTEES.

RULES, MEN AND DISCIPLINE:

COMMISSIONERS GABRIEL, BRADNER AND HALLIWELL.

STATION HOUSES, REPAIRS AND SUPPLIES:]

COMMISSIONERS BRADNER, HALLIWELL AND GABRIEL.

FINANCE AND ACCOUNTS:

COMMISSIONERS HALLIWELL, McNEIL AND GABRIEL.

APPOINTMENTS:

COMMISSIONERS McNEIL, BRADNER AND HALLIWELL.

ADDRESS OF COMMISSIONERS.

JOHN H. FARLEY, - - - - -	CITY HALL.
W. H. GABRIEL, - - - - -	50 MICHIGAN STREET.
J. H. BRADNER, - - - - -	128 DETROIT STREET.
A. B. HALLIWELL, - - - - -	85 MICHIGAN STREET.
JAMES McNEIL, - - - - -	560 DETROIT STREET

Rule 49% allows each member of the force six days leave of absence each year, at full pay.

STATION HOUSES.

No material change has been made in Station Houses during the year.

In accordance with a resolution adopted by the Honorable City Council, the Board assumed control of a room in City Armory, and have fitted the same in comfortable style as a prison for children under fourteen years of age; and have furnished the new 6th and 10th Precinct Stations with furniture complete, as these Stations were accepted late in December, 1882, too late to be furnished during that year.

During the year the force has increased thirty-one men, and the Board has been obliged to make some additions to nearly all Stations in order to accommodate this increase.

The condition of the Police Court Fund, from which all bills for repairs are paid, has been entirely satisfactory during the year. All claims are paid and the Fund increased \$7,284.43 in twelve months, and now has a credit balance of \$11,983.56.

CLEVELAND, JAN. 2, 1884.

J. W. Schmitt, Superintendent of Police:

DEAR SIR,—During the year ending December 31, 1883, 37,397 emigrants arrived in the city, of whom 31,971 came via the L. S. & M. S. R. R., in 742 cars; 3,494 via N. Y. P. & O. R. R., and 1,922 via Cleveland & Pittsburg R. R.

Four thousand five hundred and fifty-five emigrants settled in the city from different nations, as follows: Germans, 1875; Bohemians, 868; English, 479; Hungarians, 323; Irish, 994, and Italians, 16.

During the year \$53.27 was spent for bread and cheese.

Most of the emigrants stopping in this city had friends here, but those that had no friends, had much difficulty in getting employment.

Respectfully Yours,

HENRY SCHROEDER,

Detective, Union Depot.

FINANCIAL.

The attention of the Honorable City Council is respectfully called to the financial condition of this Department as given in detail on another page of this report.

Since our last report was in print the Legislature enacted what is usually known as the "Scott Law" and one of its results is to leave a large balance in the City Treasury to the credit of police fund.

The tax levy for Police purposes of $1\frac{1}{2}$ mills, for 1884, was based on a force of 175 men but as soon as the "Scott" money was paid to City Treasurer the Board answered the call for "more police" by appointing 31 additional men whose salaries will increase the expenses of the Department in 1884 at least twenty five thousand dollars, which is not provided for by tax levy. Transfers from Police Fund if any are made should be with a clear understanding on this point.

The Board have paid from Police Court, Pension and Contingent Funds, more than an average during the year, but the receipts have been so satisfactory that each shows, a good healthy gain during the twelve months ending with this date.

PROPERTY REPORTED STOLEN AND RECOVERED FOR TEN YEARS.

	Stolen.	Recovered.	Per cent. Recovered.
1874.....	\$35,559 88	\$17,856 87	50 75
1875.....	50,109 77	29,273 85	58 41
1876.....	34,763 73	24,055 23	69 20
1877.....	37,677 97	30,053 00	79 76

1881.....	133,444 40
1882.....	143,089 10
1883	162,589 30

Finally, the Board take a just pride in commending this report and accompanying statistical tables to the consideration of the Honorable City Council and citizens generally, confident that a perusal will convince all that the affairs of the department under its charge have been faithfully and economically administered.

By order of the Board,

THOMAS KING, *Secretary.*

POLICE FUND.

15th ward, at O. F. Lohman's drug store, 600 Woodland avenue, morning.

Office and residence, corner Woodland avenue and Forest street.

SEVENTH PRECINCT—L. S. CHADWICK, Office 1930 Euclid avenue, and at 1569 Euclid avenue.

From the Lake shore along Case avenue to Euclid avenue, along Euclid avenue to Fern alley, along Fern alley to Prospect street, along Prospect street to Hayward street, along Hayward street to Garden street, along Garden street to Willson avenue, along Willson avenue to Quincy street, along Quincy street to the city limits, east, along the city limits to the Lake shore, north, along the Lake shore to Case avenue.

EIGHTH PRECINCT—F. B. NORTON, Office corner Broadway and Waller street, all of 18th ward.

Eleventh annual report of the Secretary of the Board of Health for the year ending December 31st, 1883. Approved by the Board at its session March 12th, 1884, and he was instructed to forward the same to the City Council, with a request that it be printed.

By order of the Board.

JOHN H. FARLEY,

W. H. FARRAND, *Secretary.*

President.

GEO. C. ASHMUN, M. D.,

Health Officer.

HEALTH OFFICER'S REPORT.

Hon. Board of Health:

GENTLEMEN,—The care of and for the health of the people continues to be an important part of this city's affairs. During the year just closed, the methods for preserving and increasing sanitary conditions throughout the city, have not been changed materially in form, but improved in detail. The measures looking to the prevention of disease are becoming more practical. Sickness often prevails where sanitary conditions are chiefly good, but the death rate from such sickness, under such conditions, is reduced to its possible minimum; therefore the "death rate" does not always indicate the amount of sickness.* It is true, however, that in choosing a place for continued residence, there is no better guide to its safety to health, than its proportionate "death rate." In this connection it is gratifying to present you with the report of a low "death rate" in this city during the year. With the census taken by the Police Department in January as a basis (194,625), and the total number of deaths, as reported to the Secretary, to be three thousand three hundred and ninety-nine (3,399), the rate per thousand of population for the year becomes 17.41. This shows a decrease of one per thousand, as compared with the year previous. In comparison with other cities of about the same population, it is found that few, if any, present so good a showing.

No diseases have prevailed in epidemic form, and no ward or division of the city, has suffered markedly in comparison with the rest. It still remains true that nearly one half (1618) of all deaths occur among children less than five years old. Repeated investigation of the causes operating to produce such results, convinces me that *ignorance* and *neglect* on the part of parents and guardians, are the first and most active. No general sanitary regulations, ordinances and laws, however well enforced, can take the place or overcome the results of a failure of parental care. For this reason, to reach and remove the chief causes of the great infant mortality of cities, the *education* of parents, and the children who in time are to become parents how to live so as to avoid sickness, becomes an important sanitary indication. It is highly probable that only so far as the efforts of municipal officers and others results in the education of people, are sanitary conditions materially advanced. For the vicious and ignorant, law and penalties for its disregard are required. For the intelligent and right-minded, suggestion and prompting only, to overcome forgetfulness and bad habits. It has been the custom of this office to furnish the seekers for information, whether as news gatherers or otherwise, the fullest possible opportunity to secure items of interest connected with the Department. And the interest of all classes of citizens in sanitary matters has apparently increased. They are alert and watchful in regard to their own, their neighbors, and the city's defects. It is a favorable sign that this office receives prompt notification from citizens of the omission and commission of acts endangering the health and sanitary comfort of the people.

The returns made to the Secretary show a large number of births during the year (6,177). This is a large proportion for the population as compared with the number of deaths. It is believed that the apparent rate of increase, as compared with other years, is partly the result of more careful collec-

tion of such returns. But the fact remains that the city has gained by "natural increase" alone about *twenty seven hundred*. This indicates a vigorous "vital movement," encouraging for the future of this community. It may be seen by reference to a table in the Secretary's report, that there has been reported to him *eight hundred and forty-seven* cases of *diphtheria and croup* during the year, with three hundred and forty-eight deaths, a percentage of deaths of 41. In connection with this disease, it is noticeable how rarely in this community the colored race are affected by it. During the last three years there has been but *one death*, and only three or four cases reported. It certainly cannot be attributed to their improved conditions as compared with the rest of our population. Next to diphtheria, among zymotic diseases, *typhoid fever* has caused the greatest number of deaths—*one hundred and five*. What the relative proportion of deaths to cases occurring, cannot be determined, as it has been obvious that many cases were not reported by the physicians in charge. As the record stands, about ten of every twelve affected died—a record of results not to be credited, for the reason given. The total number of deaths reported from zymotic diseases was one thousand and eighty-one (1,081), a percentage of the whole number of deaths of 31.80, and a decrease from the year preceding of one hundred and sixty-seven (167).

Various subjects of importance have been presented for consideration and action during the year, but none of more importance to the city at large, than that of establishing ponds for various purposes, within the city's boundaries, and near the dwellings of people. It has been the custom since the city's infancy, to form ponds, and no matter for what other purposes used, to gather ice from them, as the demand for it might suggest. When first formed, these ponds were commonly not in districts thickly populated. As the city has extended its boundaries and increased in population, these ponds have come to be more or less surrounded by the dwellings, manufactories and

business places of the people. Also, as the demand for ice has come to be great, new ponds have been formed from year to year, and all of value chiefly for the ice they furnish. As a natural result of population and business, these places where water is caused to become stagnant, receive filth, and the water and ice becomes filthy. In later years, the water has been allowed to drain away in the spring, summer and autumn months, leaving the surface covered with the deposit of about three months of winter stagnation. In view of the fact that, practically, new ponds were formed in all these places each year, by the closure of dams, etc., an effort was made during the autumn, to regulate the formation of these ponds within the city, by establishing a rule, requiring all persons contemplating the formation of a pond, or ponds, to first obtain a "permit" from the Board to do so. The application for such a permit, must state the location, source of water supply, and purpose for which the ice is to be used. Under the operation of this rule, several applications were received for ponds in localities where injurious effects had been complained of, and remonstrated against by the people living near. These applications were refused. Two applicants thus refused, proceeded to establish their ponds without regard to the action of the board. Action was brought against them in Police Court, in the name of the State. The testimony offered was to the effect that, injurious and offensive gases arose from the ground where these ponds were, during the summer after the water was drained off. No testimony was offered by the defense. The jury returned a verdict for the State, and the case was appealed to the Court of Common pleas. No issue was made upon the subject of the quality of the ice obtained, as it was conceded that the ice was used for refrigerators and not for domestic purposes. The questions presented by this case for the Court to decide, were chiefly, *first*: Is the party who establishes a pond of impure water, responsible for the ill-effects of the impurity, to which he is not a contributor? *Second*:

When a stream of impure water is stopped, or otherwise caused to become stagnant, deposits material which would otherwise be carried away quickly, does not the party causing the stagnation become responsible for a share of the injurious effects? These are practical questions, and have a direct bearing upon this subject. The fact that the city itself has contributed to the pollution of the water forming the ponds at issue, was brought forward in argument, and was felt to be an addition to the difficulties of the case.

Much time and labor has been given to the inspection of schools and school buildings. It involves much labor and time, and with no authority to remedy evils found to exist, it is labor without much present improvement. The chief of all the evils, at the present time, is the over crowding of school rooms. Children and teachers are poisoned daily, in many rooms. The vitality and development of children, especially in many of the so-called "primary" schools, are being impaired almost beyond hope of recovery. All arguments in favor of education, must start with the admission that with it no bodily harm must be allowed. This is not the case in this city, as pale faces and puny bodies testify. And the great want to remedy it, is a full supply of pure air. The attainment of educated faculties, and strong, well developed bodies, at the same time, is possible. The newer school buildings are great improvements over the older. But most so-called relief buildings, and the rented rooms and buildings, are sad places to contemplate. The "relief" furnished, is in the nature of a more or less slow death.

The different branches of the work of this department, have been carried on by the same methods as during the previous year. There was a change made in the districts for day scavengers, and an increase in the force employed, at the expiration of previous contracts, in June. This change has resulted in a great improvement in the work of removal of swill and garbage. It still remains the branch causing most

annoyance to the citizens and department. And there is still room for much improvement in it, which experience will bring.

In all branches, those on whom the details of work have fallen, have shown a desire to perform, and in the main have performed, their duties faithfully and cheerfully. Again I would express the conviction that the sanitary officers of the city should be made as secure in their positions as are those of the Police and Fire Departments. To the members of the board, and other associates in city affairs, I wish to express my sense of obligation for counsel and assistance in the discharge of my official duties.

G. C. ASHMUN, *Health Officer.*

Dec. 31, 1883.

SECRETARY'S REPORT.

To the Honorable Board of Health:

GENTLEMEN:—I have the honor to submit to you the Eleventh Annual Report of the Health Department of the city for the year ending December 31st, 1883.

During the year just closed three members retired, Hon. R. R. Herrick, Mayor and ex-officio president of the Board, Drs. H. W. Kitchen and J. F. Armstrong, all of whom had served on the Board since its organization, and were among its most zealous and faithful members; when their term of office expired in April they were succeeded by His Honor John H. Farley, Mayor, Drs. Wm. T. Corlett and F. Fliedner, the Mayor to serve two years as President ex-officio, and the two named three years each. The Board in reorganizing retained most of the old employees, making only such changes as efficiency and discipline required.

FINANCES.

The resources of the department were from the following sources:

RESOURCES.

Tax levy.....	\$20,303 86
Balance on hand from 1882.....	807 78
Permit to gather ice from pond on farm.....	5 00
Sale of two calves.....	8 00
Sale of Vaccine.....	10 25
Permits to slaughter cattle and dress poultry.....	700 00
Newburgh Fertilizer Co., on contract permitting them all animals dying within the city.....	1,237 50
Milk permits.....	696 00
Total.....	<u>\$23,768 48</u>

DISBURSEMENTS.

For general expenses.....	\$21,554 47
For Maintaining Pest House and farm.....	1,097 26
Total.....	22 651 73
Balance on hand January 1, 1884.....	1,116 75
Grand Total.....	23,768 48

The following table will show amount expended each year for eleven years, including 1883.

1873.....	\$28,416 14	1878.....	\$12,493 71
1874.....	25 066 58	1879.....	12,036 52
1875.....	19,549 38	1880.....	12,908 95
1876.....	16,168 05	1881.....	16 030 99
1877.....	14,283 18	1882.....	20,329 32
1883.....			\$22,651 73.

The amount received is expended by the Board, which make all its own contracts and audit and order payment of its bills exclusively, no other department, the Council excepted, has any voice in your transactions, and the Council approve contracts only. The revenue of the Board is expended for maintaining the Pest House and farm, and the general expense necessary to maintain the sanitary department, and an accurate account is kept with each as follows:

FOR MAINTAINING PEST HOUSE AND FARM.

Groceries and meat.....	\$ 435 26
Sundry small repairs.....	31 99
Cash advanced by Steward as per vouchers.....	58 43
Medicines for 1882 and 1883.....	29 82
Blacksmithing.....	27 38
Coffin.....	4 50
Cutting Hay.....	44 00
Toll for one year.....	4 96
New pump and repairing cistern.....	35 25
Matron and Steward, salary.....	360 00
Rent of Telephone and care of lines.....	65 00
Total.....	\$1,097 26

The Pest House and farm has cost less than for several years past, mainly from the fact that one patient only was cared for and that for only a short time. It has several times been suggested that this hospital be removed to the Infirmary farm, which would be more convenient and two or three miles nearer the city, but as yet no definite plan has been settled upon.

THE GENERAL EXPENSES WERE

For removing swill and garbage.....	\$6,203 28
Horse for Health Officer and Inspector of Slaughter House for five months.....	204 15
Stationery, Printing, Advertising, Blank Books, etc.....	411 97
Rent of telephone in Health Office.....	15 00
Ambulance, 14 runs at \$5.00 each.....	70 00
Sanitary pay-roll, (not including Pest House).....	14,181 53
Cleaning and refitting District Physician's office after its occupancy by tramp small-pox patient.....	70 17
Printing Annual Report, (1882).....	156 25
Directory.....	5 00
Oil cloth, painting and repairing Board rooms.....	86 52
Care of woman found on the street.....	34 00
Gas one year.....	8 02
Street car tickets for the Department.....	31 00
Stamps and postal cards.....	46 01
Vaccine virus.....	13 60
Sundry small bills.....	17 99
Total.....	\$21,554 47

This is an increase in general expense account alone of \$3,281.67 over general expenses for 1882, but the increased cost of removing swill this year was \$3,705.92 more than last, of which \$235.88 (10 per cent.) was held back from the swill contractors for services rendered during the second half of the year 1882, so were it not for the increased cost of removing swill, the general expenses would have been less this than the previous year.

MILK.

The department has issued 696 permits to sell milk at one dollar each. The amount sold daily as given by the venders themselves amounts to 14,720 gallons, 288 wagons sold 12,641 gallons, 304 stores, bakeries and markets sell 1,659 gallons and 104 houses, (dwellings) most of whom keep milch cows, 420 gallons. Two thousand one hundred and nineteen cows are owned by country milkmen, 223 of which are kept within the city limits. Some of this milk comes from thirty to forty miles by rail to find a market. No arrests have been made during the year for selling impure or adulterated milk. Tests are made daily by the sanitary force, and samples are frequently sent to the office for analysis. As a rule the milk during the year has been found very good, partly owing doubtless to the great increase in the supply from small towns lying along the new railroads, opening up some of the best dairy country in the State.

CONTAGIOUS DISEASES.

1883.		1882.	
Cases Reported.	Deaths.	Cases Reported.	Deaths.
Diphtheria 870	247	Diphtheria..... 847	210
Scarlet Fever .. 316	41	Scarlet Fever.. 516	75
Typhoid Fever . 123	105	Typhoid Fever 58	132
Puerperal Fever 13	47	Puerperal Fever 8	36
Measles 58	10	Measles..... 17	20
Croup 11	101	Croup..... 2	118
Erysipelas 19	14	Erysipelas..... 1	12
Small Pox 2	1	Small Pox..... 32	8

Total cases reported during 1882, 1,481 and 601 deaths; cases reported 1883 was 1,412, with 566 deaths. Puerperal

fever and croup had more deaths than cases reported. The cases of diphtheria, scarlet fever and small-pox are correct, or nearly so, but the rest of the table is worthless for reference or comparison and good for nothing, unless it is to show the respect shown the orders of the Board by physicians.

MORTUARY.

Two hundred and fifty-five (255) bodies were removed by permit of the health officer from the city during the year, and nearly as many received from other cities and towns. Of these latter no record is kept, except in the cemeteries, where they are entered. I would recommend that the Board adopt some measure correcting this oversight, so that hereafter a complete record of all interments of these "foreign" deaths and their place of burial will be on record in this office.

VAULTS AND NIGHT SOIL.

Permits were issued for the construction of 1409 brick and cement vaults of a plan adopted by the Board. 9,238 yards of night soil were removed, 344 yards by special permit, an increase over 1882 of 1,596 yards. All vaults were first measured by a Sanitary Patrolman, who, after they were reported as cleaned by the contractor, re-measured the vault and certified to the amount excavated before payment to the contractor was made. This system has given general satisfaction, both to the department and to parties served.

MISCELLANEOUS.

There was issued 26 slaughter and rendering permits and 43 permits to dress poultry, for which a fee of \$10.00 each was received and paid into the Sanitary Fund. The contract

with the Newburg Fertilizer Co., who contracted to remove all the dead animals from the city and pay a royalty for the same, expired early in the year, when they suggested that the Board receive proposals for three years instead of one year as heretofore, which was agreed to, and the contract was awarded to them for \$1,000 per annum, an increase over last year of \$250. They remove the dead animals with little or no annoyance to the Department. Eighteen hundred and three (1,803) complaints were lodged with the Secretary, exclusive of those received by the Health Officer.

Permits were issued permitting the construction and maintaining of nine ponds within the city limits, from which ice may be gathered and used for the purposes designated in said permit. There was rejected six applications vs. Burk Brook Ice Co. (on Mill Creek) L. Schlaughter, A. Marquard, G. A. & H. G. Weitz, H. Hoffman and Geo. W. Morgan. Five other petitions were received but as yet not acted upon. G. A. & H. G. Weitz did not heed the refusal of the Board to grant them a permit, and continued as usual. Their pond is on Walworth Run, receives and retains a large amount of waste from slaughter houses located above them, and complaints have been lodged against this pond annually for the last ten years. Weitz Bros. were arrested, tried and fined in the Police Court, but they took the case to a higher court where they hope to get relief.

Accompanying this report are tables showing the number of deaths occurring during the year; deaths from zymotic diseases by wards; total deaths in each ward, nativity and deaths in public institutions. The number, of births occurring, nativity and age of parents. District Physicians reports consolidated, and also yearly reports of the Sanitary Patrol and nuisances abated, and orders given, classified and showing the amount of work performed by each man.

Permit me before closing to thank the Board individually and collectively for the many courtesies extended to me dur-

ing the year just closed, also to the Health Officer and his assistants, who have uniformly manifested their desire by promptness, dispatch and courteous bearing to make my association with them in an official capacity a pleasure, and long to be remembered.

Hoping the services rendered by me have met with your approval.

I am most respectfully,

Your obedient servant,

WM. H. FARRAND,

Secretary and Registrar.

SEWER INSPECTOR'S
REPORT.

SEWER INSPECTOR'S REPORT.

To the Honorable Board of Health:

GENTLEMEN—I herewith present my annual report for the year ending Dec. 31, 1883:

During the year there were issued 2,996 permits, as follows, viz.:

To construct new sewers.....	1,253
To repair and clean sewers.....	522
To construct new plumbing.....	1,019
To repair plumbing.....	202
Total.....	2,996

In former reports I have urged upon your Honorable Board the necessity of a revision of the rules regulating sewerage and plumbing; and I am now more fully impressed than ever, of the urgent need of it, in order that more specific rules may be laid down and insure greater uniformity, as well as a better class of work.

A plumbers' society is now organized, the object of which, as I understand, is to elevate the profession, by a mutual interchange of views on the best methods of doing work. To guard against incompetents, it is proposed that all applicants for licenses shall be examined by a board of examiners, who shall report favorably on the ability of the applicant, to supervise, or do the work for which such license is required.

A committee of the Board of Health, I think, should be appointed, and the plumbers' society requested to appoint a committee to confer with them, and adopt rules and regulations more in accordance with the advance in knowledge in sanitary plumbing and sewerage.

In my last annual report I referred to the practice in some cities, of requiring the registration of journeymen plumbers, who alone are allowed to do work under the supervision of the Board of Health. Such a rule, if carried out in a proper spirit, would be beneficial to the competent workman, the employer and the public.

If proper bonds are furnished, any one, at present, may obtain a license as plumber or sewer builder, which is decidedly prejudicial to good policy and the public welfare.

Plans for sewerage and plumbing should be submitted to, and approved by the Board before permits are granted.

It is generally admitted that suggestions of a change in sewerage or plumbing plans is generally received by architects with disfavor, and it is feared debar the offending party from bidding on future contracts over which the architect may have *entire* control.

The submission of plans to the Board, might, I think, be the means of obviating trouble between architects and sewer builders and plumbers.

In former reports I have urged the necessity of a thorough ventilation of the main sewers, and when the subject was discussed by the Board it was approved of, but nothing has been done.

I think it unnecessary to repeat what has been gone over pretty fully in my former reports, covering ventilation, flushing, etc., on none of which have I had any reason to change my views, and would therefore most respectfully refer you to them.

GEO. ANDERSON,
Inspector of Sewers.

TWENTY-EIGHTH
ANNUAL REPORT
OF THE
BOARD OF
TRUSTEES OF WATER WORKS
TO THE
CITY COUNCIL,
TOGETHER WITH THE
REPORTS OF THE OFFICERS OF THE BOARD,
For the Year 1883.

TRUSTEES' REPORT.

To the Honorable Mayor and City Council of Cleveland:

GENTLEMEN: The undersigned would respectfully submit this, the twenty-eighth annual report of the Trustees of Water Works, together with the reports of the Secretary, the Superintendent and Engineer, and the Engineer of Pumping Works.

The receipts for water for the year amount to \$274,614.15, the expenses and repairs to \$73,210.82, leaving the net earnings \$201,403.33, being an increase in receipts over the previous year of \$22,619.69, and of net earnings an increase of \$15,101.90.

The expenditures for permanent improvements, including lands for Reservoir sites and high service pumping station were as follows:

Main pipes, 30 and 36 inch, including valves and labor laying same....	\$152,898 42
Distributing pipes, including valves, five hydrants, and labor laying same	131,440 95
Land for Fairmount Reservoir and pumping station and cost of appropriation.....	23,333 51
Land for High Service Reservoir	10,160 83
Contractors' estimates Fairmount Reservoir.....	45,323 33
Contractors' estimates High Service Reservoir.....	10,731 53
Estimates for addition to boiler house.....	21,279 26
Estimates for new boilers and fittings.....	11,532 99
Water Meters and setting same.....	10,650 27
Other items of cost of permanent improvements	22,614 11
Total payments for lands and permanent improvements....	\$445,009 75

Two hundred and fifty thousand dollars of City bonds for water works purposes were issued, and the proceeds used in part payment of the above expenditures, the balance being paid from the surplus earnings of the department. Further issue of bonds will be necessary to complete the work now under contract, and for main pipes connected with the distribution system of the high service district.

Contracts entered into and the estimated amounts to be expended under them are as follows:

Fairmount Reservoir, with McReynolds & Co., estimated amount...	\$269,184 50
High Service Reservoir, with Messrs. Hall & Freeman, estimated amt.	120,291 06
New boiler house, with Messrs. Uhl & Kosterling, estimated amount..	20,818 43
Three steel boilers, with the Globe Iron Works	14,985 00
Fittings by the pound and piece, Main pipe, 30 in. and 36 in., with Silas Merchant, estimated amount.....	166,300 00
Pumping engine, Henry R. Worthington.....	34,500 00

The report of the Secretary furnishes information in detail of the financial condition of the department, and shows a very gratifying increase in revenue.

The report of the Superintendent and Engineer, and the Engineer in charge of Pumping Works show the condition of the works, and the progress of the new enlargement so fully that anything additional from us would only be repetition. The suggestion in both of these reports that the old Cornish engines be taken out and used for the High Service works, merits, and will receive from us, careful consideration. We will, with your co operation, endeavor to complete the improvements now in progress, at the earliest date practicable, consistent with safety and the substantial construction demanded in work of this character.

We estimate the cost of the work to be done during the ensuing year as follows:

Contractors' estimates, Fairmount Reservoir.....	\$200,000 00
" " Kinsman street Reservoir.....	110,000 00
" " new boilers.....	10,000 00
Main pipe under contract.....	60,000 00
" " to be laid south of Kinsman street.....	70,000 00
Distributing pipe, low service district.....	180,000 00
Sub-mains and distributing pipe in 18th ward.....	50,000 00
High Service Engine House and Engines.....	100,000 00
<hr/>	
Total estimates for permanent improvements.....	\$780,000 00
Add operating expenses and ordinary repairs.....	75,000 00
<hr/>	
Total anticipated expenditures.....	\$805,000 00
Deduct estimated receipts for water.....	290,000 00
<hr/>	
Amount of bonds required.....	\$515,000 00

Water is supplied to the different departments of the city free of charge, for use in public buildings, parks, cemeteries, etc., through 130 supply pipes and through 26 to hospitals and charitable institutions. 1501 fire hydrants and 70 fire cisterns are also supplied, besides the water used for flushing sewers and puddling streets and sewer trenches and sprinkling streets.

We desire to call your attention to the wasteful extravagance in the use of water by some of the charitable institutions now furnished with lake water, free of charge, under an act of the Legislature. While it is eminently proper that such institutions should be supplied with a liberal quantity of water per capita without charge, it is our experience that many of them habitually abuse the privilege. We know this to be a fact from the record of the meters we have caused to be placed on some of the pipes through which the supply is drawn.

One such institution, having an average of about four hundred inmates during the six months ending Oct. 1st, 1883, used and wasted at the rate of 24,400 gallons per day, or more than 60 gallons per capita per day, just double the quantity necessary for all useful and sanitary purposes

We would suggest that application be made to the Legislature to amend the act referred to, limiting such institutions to a given quantity per capita per day, and requiring them to pay the regular rates established for water for all excess. Also that the proper officer of all such institutions be required to file with the Secretary of Water Works, as often as may be required, a sworn statement of the number of resident inmates of such institution for the term for which water bills may be made.

Respectfully submitted,

WM H. LUTTON,
WALTER BLYTHE,
PERCY W. RICE.

} Trustees
of
Water Works.

Cleveland, March 6, 1884.

SECRETARY'S REPORT.

To the Board of Trustees of Water Works:

I hereby respectfully submit my report as Secretary, for the year 1883:

The receipts for water, including permits, less am't refunded, is....	\$274,614 15
The net amount of expenses and repairs is.....	73,210 82
Leaving the net earnings.....	\$201,403 33

The comparative amounts with the previous year are:

Increase of receipts for water.....	\$ 23,619 69
Increase of expenses and general repairs.....	\$2,511 84
Increase of lake crib repairs.....	5,005 95
Increase of net earnings.....	\$ 15,101 90

The receipts and disbursements of cash for the year, including balance as shown by the books of the office, are:

RECEIPTS.

Cash in city treasury, January 1, 1883, as per report.....	\$ 15,023 89
Cash in office January 1883, as per report.....	1,243 84
For water, from assessments, &c., less amount refunded	158,544 23
For water by meter measure " " "	110,453 92
For permits (in water rent account).....	5,616 00
For par value of Water Works bonds sold.....	250,000 00
For premiums on \$100,000 of same.....	1,120 00
For buildings on reservoir lands sold.....	1,291 00
For water meters.....	348 25
On office and general expense account.....	465 10
On general repairs account.....	218 84
On engine house expense account.....	27 90
On pipe extension account	5,209 06
	<hr/>
	\$549,621 03

DISBURSEMENTS.

For pipe extention.....	\$ 289,808 48
For Fairmount reservoir lands.....	28,978 80
For Fairmount reservoir contractors' estimates, &c.....	64,184 61
For Kinsman street reservoir lands.....	9,926 00
For Kinsman street reservoir contractors' estimates, &c.....	15,414 96
For payments on new boiler house.....	21,379 26
For payments on new boilers.....	11,583 90
For water meters, and setting the same.....	10,998 52
For interest on water works bonds.....	20,000 00
For office and general expenses.....	25,914 28
For expenses at engine house.....	86,196 80
For general repairs.....	5,479 40
For repairs at engine house.....	1,326 26
For repairs at lake crib.....	5,005 92
Cash in city treasury, subject to draft, January 9, 1884.....	2,160 86
Cash in office January 9, 1884.....	1,619 96
	<hr/>
	\$ 549,631 08

The disbursements include pay rolls and other claims of the month of December allowed by the Board of Trustees at their meeting, January 6, 1884, and the balance in the city treasury is the amount subject to draft after payment of the same.

The items and amount of receipts in the foregoing statement, and not included in water rent account and for proceeds of bonds sold, are from

*For ten months.				

BONDS AND INTEREST.

City bonds for water works purposes have been issued during the year amounting to two hundred and fifty thousand dollars, including fifty thousand dollars issued January, 1884.

One hundred thousand dollars of the same are four per cent. bonds and were sold with other city bonds at a premium of eleven hundred and twenty dollars.

The balance, one hundred and fifty thousand dollars are six per cent. bonds and were taken at par value and accrued interest by the Sinking Fund Commissioners of the city.

BONDS OUTSTANDING.

Four hundred thousand dollars 7 per cent. bonds, due in	-	1892
Two hundred thousand dollars 7 per cent. bonds, due in	- -	1893
Two hundred thousand dollars 6 per cent. bonds, due in	-	1895
One hundred and fifty thousand dollars 6 per cent. bonds, due in		1897
One hundred thousand dollars 365-100 per cent. bonds, due in		1902
One hundred thousand dollars 4 per cent. bonds, due in	-	1903

The annual interest on bonds now outstanding amounts to seventy thousand six hundred and fifty dollars.

Of the interest due in 1883 on water works bonds, thirty-nine thousand six hundred and fifty dollars was paid from the interest fund of the city and twenty thousand dollars from the water works fund.

It seems proper to note that in addition to water furnished for private use for which payment is made, a large amount is furnished for public use and to charitable institutions without charge, and that the cost of furnishing water for public use and such institutions is entirely at the expense of the paying water consumers unless a tax be levied upon the taxable property of the city for the payment of the interest on the bonded debt for water works purposes.

H. C. HAWKINS,

Secretary.

CLEVELAND, March 6, 1884.

SUPERINTENDENT'S REPORT.

To the Board of Trustees of Water Works :

GENTLEMEN—I herewith submit the twenty-eighth annual report upon the condition of the Water Works :

LAKE CRIB.

During the early part of the summer a number of the planks forming the outer sheathing of the crib were torn off during a heavy storm.

The timbers forming the walls of the structure were found to be considerably decayed in many places. New timbers were inserted in the weakest places, backed by upright posts, and new plank placed on the outside; iron straps were then placed outside of the planking and securely fastened by bolts passing through the timber wall.

The walls were further strengthened by placing additional upright timbers and braces on the inside.

The wrought iron band that had been put round the crib after its damage by the storm of September, 1878, and had become loosened by the removal of the timber blocking from under it during storms, was taken off, repaired and replaced directly on the surface of the walls, the top being at about the ordinary water line. It will now serve as a protection against the action of floating ice, instead of being, as it has been heretofore, a source of weakness and cause of anxiety.

The work done upon this band was of a very tedious and difficult character, and therefore expensive, but is permanent in its nature, and forms a part of the sub-structure of the

building. The other work mentioned is temporary and will be removed when the superstructure is rebuilt.

I renew my recommendation, made in former reports, that the superstructure be rebuilt at an early day. The weakness developed during the past season is evidence that the work cannot be longer delayed, with safety.

TUNNEL.

The flow of water through the tunnel has been uninterrupted during the year, and the quality has been, with few exceptions, all that could be desired.

BUILDINGS.

The extension of the boiler house, including a new chimney and boiler foundations, on the north lot, has been completed as originally designed. The total length of the structure is $165\frac{2}{3}$ feet with a depth of $48\frac{1}{4}$ feet.

The machine shop and blacksmith shop attached to the boiler house are respectively of the following dimensions, namely: $52\frac{2}{3}$ by $17\frac{2}{3}$ feet, and $26\frac{2}{3}$ by $18\frac{1}{2}$ feet, affording ample room for any work that can be done to advantage by the regular force employed at the works.

The new extension will contain three boilers of the marine type, each ten feet in diameter and twenty feet long, and three Cornish boilers each six by thirty feet. These boilers and their settings will be similar to those now in use.

The battlements surmounting the walls of the south pumping house have been in a dangerous condition for some time. By your order they are being removed and replaced by stone coping. The work has been delayed by the inclement weather following its commencement.

MACHINERY.

As will be seen by the report of Mr. Doty, Engineer in charge of Pumping Works, all the machinery and boilers are in good order.

The repairs made to No. 1, Worthington engine, leave it in as good condition as it was before the accident, and the plunger rods are even better than the original ones.

I agree with Mr. Doty in his suggestions relative to the removal of the Cornish engines, and using them at the high service works.

With a few repairs these engines are good for fifty years service. My reasons for their removal and their use for the high service works will be stated more at length before closing.

RESERVOIR.

The reservoir was thoroughly cleaned during the month of July. Scarcely any sediment had been deposited since the previous year. The object in cleaning it was to remove the growth of aquatic vegetation that had made its appearance a few feet below the surface of the water, and thus prevent the recurrence of the disagreeable taste and odor that appeared about the same date during the previous year. The re-appearance of the trouble was thus prevented.

MAIN PIPES.

The 36 inch main, for conveying water to the low service reservoir at Fairmount street, through Quincy street, has been laid from Willson avenue east to a point 390 feet west of Bolton avenue, a distance of 6,990 feet, at a cost of \$9.43 per foot, including all labor and materials. 140 feet of extra heavy 36 inch inlet pipe has been laid under the west embankment of Fairmount reservoir, into the north basin.

The 30 inch main for supplying water to the high service district has been laid through Woodland Hills avenue south, from a point 93 feet south of Quincy street, a distance of 2,370 feet, at a cost of \$7.08 per foot, including every item of expense; 277 feet of extra heavy 30 inch pipe for supplying water to the high service pumps has been laid under the embankments of the low service reservoir. Through these pipes water can be drawn from either basin.

Provision has also been made for taking water for the high service pumps directly from the 36 inch inlet main outside of low service reservoir.

Contracts were made in March last, for all of the 36 inch pipe and special castings necessary to complete the line from

Willson avenue to the lower reservoir, and for the 30 inch pumping and distributing main, from the high service pumping works, through Woodland Hills avenue and Kinsman street to the high service reservoir. These pipes and specials will all be delivered by April next.

Proposals should be invited at once, for furnishing such portion of the main pipes for the high service district as will be necessary for supplying the system of sub-mains that must be laid and extended as fast as the demand for water may require.

Main pipes should be laid in Woodland Hills avenue south from Kinsman street, as follows: From Kinsman street to Union street, 3,100 feet of 30 inch, with 20 inch branch in Union street west; from Union street to Way street, 2,724 feet of 24 inch, with 20 inch branch in Way street west; from Way street to Harvard street, 2,590 feet of 20 inch, with 16 inch branch in Harvard street west; from Harvard street to Miles street, 1,330 feet of 16 inch, with 16 inch branch in Miles street west.

These pipes, with the branches proposed, when laid, will, with branches already provided for in that section of the main north of Kinsman street, provide a means of supplying any portion of the territory within the high service district, through sub-mains extending from the different branches. Some of these sub-mains, particularly such as will pass through the iron manufacturing districts will undoubtedly be called for at once, and provision should be made for laying such of them as may seem most necessary for sanitary purposes, fire protection and business interests.

Your attention is again called to the necessity of another main, to be laid from the new pumping engine south, for the supply of that section of the city west of the Cuyahoga river. The streets through which it would be laid, with the length and different sizes necessary, are more particularly described in my Annual Report for the year 1881, to which you are respectfully referred.

DISTRIBUTING PIPES.

The increase in distributing pipe during the year was, for all sizes, ranging from 3 inches to 12 inches in diameter, 21 miles, 832 feet; in main pipe, 1 mile, 4,497 feet, making the total length of pipe added to the distributing system 23 miles, 49 feet. This added to the pipe laid previous to 1883, makes a total of 175 miles 4,951 feet, of which 15 miles, 2,236 feet is main pipe, and 160 miles 2,715 feet is for street distribution.

During the year, 1,932 feet of pipe was relaid, and 5 miles 1,256 feet, with the connections attached thereto, numbering 688, and measuring 3 miles 519 feet, was lowered to an average depth of six feet.

The increase in the length of pipe has been just 100 miles in ten years. During the same period, 10,012 service connections have been made.

STOP GATES.

The number of new stop gates added during the year was 424. Of these three were in the new 36 inch main. Twenty-one gates were taken out and replaced by larger ones.

The total number of stop gates now in use, of all sizes, is 3,164; of these 82 are in main pipe lines.

FIRE HYDRANTS.

The number of fire hydrants set during the year was 237, and 17 were changed from 3 inch to 4 inch water way.

The total number set at the close of the year was 1,501.

The accompanying tables give all the details necessary to a full understanding of the character and extent of the work done during the year.

SERVICE PIPES.

For the year ending December 31st, 1883, the number of new service pipes attached to the supply mains was 1872, being the largest number of connections made during any year since the introduction of lake water. These, added to the connections made prior to 1883, make a total of 16,364. Of these 664 are turned off, 815 are not extended beyond the curb line, and 44 have been abandoned and the openings

plugged, leaving the number in actual use on the last day of the year 14,841, being an increase of service pipes in use over the year 1882 of 1,918.

WATER METERS.

The number of new meters set during the year was 147; hydraulic elevators connected 3; registering water motors 2.

The total number of meters now in use is 849; of hydraulic elevators 60; water motors 4.

The name, size and number of each size and make of meters, is as follows:

KIND OF METER.	$\frac{3}{4}$ in.	1 in.	$1\frac{1}{2}$ in.	2 in.	3 in.	4 in.	Total.

Total.....							918

The quantity of water measured during the year was 1,071,078,400 gallons, an increase of 143,738,150 gallons over the year 1882. The average quantity measured per day was 2,934,461 gallons.

DISTRIBUTION.

The total number of gallons of water pumped during the year 1883 was 5,187,432,657, an increase of 692,894,121 gallons over the previous year. The daily average consumption was 14,212,144, or 1,898,340 gallons more than the daily average for 1882.

The rate of increase for the year was 15.41 per cent. The cost of pumping each million gallons 100 feet high was 4.56.

FAIRMOUNT RESERVOIR.

The contract for this work was let in June to Messrs. William McReynolds, John Gawne, John Thomas Gawne, and William James Gawne, for the sum of \$269,184.50. This sum includes the cost of all embankments, excavations, puddle lining, ballasting, concrete, paving, drainage conduit, inlet and outlet chambers, stone stairs, soiling and seeding outer slopes, and all work incidental to that above named, on the basis of the quantities estimated and stated in the specifica-

tion, but does not include the inlet and outlet pipes and gates, bridges, fencing and railing. The pipes and gates are furnished by this department and are to be laid by the experienced pipe layers regularly employed at that kind of work. The contract for the bridges, fencing and railing need not be let until the work is further advanced.

The earthwork in the outer embankments is nearly completed.

The work accomplished under the contract at the end of the year, is as follows: Earth excavation 169,336 cubic yds.; hard shale excavation 17,521 cubic yds.; clay puddle 687 cubic yds. at a cost of \$53,327.00, including fifteen per cent retained upon the work done.

The two lines of 30 inch outlet pipes for supplying water to the high service pumps, and one of the lines of 36 inch pipe for the low service district have been laid under the west embankment. These pipes are respectively $1\frac{1}{2}$ inches, and 2 inches thick, and are laid on brick piers reaching down to rock. Two rings of brick masonry, laid in hydraulic cement, 8 inches thick and 20 inches lengthwise of the pipe, are built over each length of pipe; the trenches were refilled with puddled clay, thoroughly tamped. They are all laid below the bottom line of the clay puddle lining of the basin. The cost of this work was \$9,692.68.

HIGH SERVICE RESERVOIR.

Proposals were received for building the high service reservoir late in October, and the contract awarded to Messrs. Freeman and Hall for the sum of \$120,814, they being the lowest bidders. The work having been commenced so late in the year, it was not expected that much progress would be made before winter set in, but the season proved to be favorable and a large amount of work was accomplished.

The soil has been removed from the entire surface, not only of the reservoir ground but of the land from which the material for the embankments is to be taken.

The base of the embankments and the bottom of the basin

have been brought up to sub-grade line over nearly all the surface. The quantity of material removed was 34,869 cubic yards of excavation, and 600 cubic yards of gravel has been delivered on the ground.

The total cost of the work to the end of the year, including 15 per cent. retained, is \$12,684.

HIGH SERVICE PUMPS.

The different parts of the work of enlargement and extension are nearly all under contract, and some of them are well advanced toward completion. There remains only the high service pumping works and the extension of the high service main pipe south of Kinsman street, to be provided for. For high service pumping engines I would suggest the consideration of the question of removing the old Cornish engines from their present location, and using them for these works.

I ask of you a careful investigation of this proposition for the following reasons:

First. This type of engine is adapted only to a uniform service, that is, to pumping against a nearly uniform head, and does not work well while pumping into a system of pipes into which other engines are delivering water at the same time.

Second. They are best adapted to pumping through a stand-pipe and main leading to a reservoir.

Third. In their present location they deliver water through a main pipe not large enough to allow the delivery of the quantity of water they are capable of pumping, therefore their full capacity cannot be used unless expensive alterations are made, including the laying of a larger pumping main and the building of a new stand-pipe. In times of low water in the lake, and when two or more of the other engines are running, the water fails to reach the wells from which they take suction, and at such times they must stand idle.

Fourth. Their combined capacity, as they now stand, is only seven and three-fourth million gallons in twenty four hours, while, if they could deliver water into a main pipe of suitable size, through a stand-pipe of proper height, they could easily pump ten million gallons in the same time.

Fifth. The room in which they stand is of ample size to accommodate an engine of modern design, having a capacity nearly four times greater than that of both these engines.

The fact that all the water required by the city must first be pumped from the lower works is a good argument in favor of economiz ng space at that station, to the end that the time for erecting new buildings may be put off as long as possible.

Sixth. They are admirably adapted to the work that would be required of them at the high servicestation; the conditions would be those under which they would work to the best advantage.

Seventh. The lot secured for this station is underlaid with rock, at a depth of only a few feet below the surface, thus affording a secure and reliable foundation at the lowest cost for this class of engine.

Eighth. The cost of taking them down, putting them in thorough repair, removing them to their new location, and erecting them on new foundations, would be insignificant compared to the gain in space for increased capacity at the old works, their adaptation to the work that would be required of them, and the increase in capacity that would be given them by making the change.

While their beauty of finish and proportion may not in itself have any weight as a reason for making the change, yet when considered in connection with the other reasons given for their removal, should have its influence. When these engines were built, they were acknowledged to be the finest examples of their type in America, the builders, without solicitation, having generously donated several thousand dollars in extra finish. In their present location comparatively few persons ever see them, the approaches and surroundings not being of a nature to attract visitors. At the high service station the surroundings are different, and their beauty would be seen and appreciated.

Respectfully submitted.

JOHN WHITELOW,

Supt. and Engineer.

CLEVELAND, Feb. 29, 1884.

REPORT OF THE
ENGINEER IN CHARGE
OF THE
PUMPING WORKS.

To the Trustees of Cleveland Water Works:

GENTLEMEN: The following report of the Engineer in charge of the pumping department of the City Water Works is respectfully submitted.

CORNISH ENGINES.

No expense has been necessary upon these Engines, since my last report, and very little pumping has been done by them. They remain in the same condition as when last reported upon. Under head of recommendations I have suggested a plan by which these engines can again be made available, with your approval.

HENDERSON ENGINES.

The service of these engines has been quite satisfactory, since last reported upon, and no considerable expense has been necessary to keep them in repair. The alterations in the north engine piston, referred to in my last report, have continued to give good satisfaction, and I am still of the opinion that the same alterations in the south piston, should be made at the earliest possible moment, unless more radical measures should be adopted by your Honorable Body. While these engines remain in their present position, we shall always be deficient in boiler capacity in the south building.

No. 1 WORTHINGTON ENGINE.

Sunday evening, Oct. 14th, at 8:45 o'clock, the plunger rod in the north pump, broke in the backing key slot, without giving us the least warning. Upon examination it was found that it had been fractured for some time previous. We had reason to apprehend serious results from this accident, as the whole power of the engine was expended upon itself. A careful search, however, revealed only a fractured cylinder lug, that receives the tie rod from the pump, and the starting of the nuts on the internal high pressure cylinder head. A new steel rod was immediately provided, and the fractured lug secured by means of a heavy wrought iron strap, which relieves it from all strain and makes the part as firm as before the accident. The repairs were completed Oct. 26th, and the engine was immediately started, and ran until the 5th day of November, when the south side of the same engine met with a similar accident, excepting, instead of the plunger rod breaking, the hub, or socket casting, connecting the plunger rod to the plunger, broke in three pieces, the result of which was about the same as in the first instance. A defect having been discovered in this plunger rod, it was thought best to get a new one, and a much heavier socket casting. These were provided, and the repairs completed November 18th. Since that time this engine has performed her regular work in the usual manner, and shows no signs of ever having met with an accident.

I am unable to give a satisfactory cause for these two accidents, but in looking over my Journal, I find that in the early history of these pumps a slight casualty took place, in the drawing out of two suction valve seats, one from each pump, but at different times. These casualties could not happen without giving the pumps more or less of a shock, but a careful examination at the time, disclosed no damage in these parts of the machinery. The actual cause for these accidents will probably always remain a matter of speculation. How-

ever, if the drawing out of these two suction valves was the primary cause, we have nothing to fear from a repetition of these accidents to our No. 2 Worthington engine, as I inserted a clause in the specifications for those engines, requiring the valve seats to be secured by bolts and nuts in place of the lead caulking, as in the No. 1 engines.

NO. 2 WORTHINGTON ENGINE.

The performance of this engine has been so perfectly satisfactory that I need only to refer you to the schedule, when you will observe that she leads the list in point of economy and amount of water pumped.

ENGINE REPAIRS.

No repairs have been necessary upon any of the engines at the Works, aside from what was done by our regular force, the expense of which will appear in the Secretary's Report of Pumping Works' running expenses, except the accidents to No. 1, which amounted to \$352.91.

BOILERS.

Three new boilers of the same size and general plan as our last three, placed in the north side boiler house in 1881, have been constructed and delivered, for the new Worthington engine now under contract. With this exception our boiler capacity remains the same as last year. Slight repairs only have been necessary, and the boilers are in good order at this time.

RECOMMENDATIONS.

In view of the fact that, during the coming year, engines must be provided to supply the new high service reservoir, I would recommend that the Cornish engines be removed from their present location in the old north side building and erected in a suitable building at the new low service reservoir on Woodland Hills av. This suggestion implies also the remov-

al of the six Cornish boilers now operated in connection with these engines. There are several important reasons for making these recommendations. A few of the most apparent, will, I think, satisfy you that they are worthy of your consideration. The Cornish engines cannot be successfully operated through the same main with any other engine, consequently, if allowed to remain in their present location, the expense of a new main from the old works to the new low service reservoir must be met. The old tower must be taken down and a new one provided, and the suction pipes extended to the new pump wells outside the building. The expense of these changes and necessities will involve a much larger outlay than would be necessary to take the engines down and erect them at the new reservoir. The valuable space they now occupy, could then be used to erect two engines of much greater capacity, and the department would not be obliged to enlarge the present building at the old works for many years.

The increasing necessity for power tools, as lathes, planes, drills, etc., for our vacant machine shop room, seems to warrant me in calling your attention to the matter, at this time. It has been our policy to do all the repairs possible, at the Works, and we now have eight pumps, large and small, and the coming summer will add another. These, in connection with fifteen boilers, must necessarily require considerable repairs. It is obvious, therefore, that with a well selected stock of tools at hand, much expense and delay can be saved to the department.

Tables giving the amount of work done by the different engines during the past year, also showing all the work done since the Works were started, are herewith appended, to which your attention is invited.

Respectfully submitted.

R. DOTY.

Engineer in Charge.

CLEVELAND, Feb. 24, 1884.

TABULAR STATEMENTS.

The following pages contain tabular statements showing the work of engines, distribution of water, extension and laying of pipes, location and number of stopgates and hydrants set, abstract of expenditures, &c.

SCHEDULE SHOWING THE EXTENSION OF WATER PIPE IN 1883.

Side.	Size.	Street.	Between What Points.	Feet Laid.	Totals.	Remarks.
North	36 in.	Fairmount reservoir.	Under embankment of the North Basin.	140		
	36 in.	Quincy.	From E. L. Willson avenue to 380 ft. W. of Bolton avenue.	6,990	7,130

ANNUAL REPORT
OF THE
CITY SOLICITOR

OF THE
CITY OF CLEVELAND,

FOR THE
Year Ending December 31st, 1883.

CITY SOLICITOR'S REPORT.

To the Honorable City Council:

GENTLEMEN,—I herewith submit my report for the year ending December 31st, 1883.

The following tables disclose the litigation in which the city has been involved during the past year, and the disposition of such cases as have been finally disposed of. The result of the litigation, as will appear from an examination of the report, has been quite favorable to the city. The number of cases that have been brought against the city is somewhat larger than last year, but there has been no greater increase than the growth of the city will readily account for. The business of this Department, aside from the city's litigation, is increasing from year to year, and will continue to increase so long as the present growth of the city is maintained.

Respectfully submitted.

GEO. S. KAIN,
City Solicitor.

Report of the city's litigation for the year ending December 31st, 1883:

CASES PENDING JANUARY 1, 1883.

In the Supreme Court of the State.....	14
“ “ District Court of Cuyahoga county.....	16

“ “ Circuit Court of the United States.....	0
“ “ Probate and Magistrates' Courts.....	25
<hr/>	
Total.....	94

CASES DISPOSED OF DURING THE YEAR 1883.

In the Supreme Court of the State.....	9
“ “ District Court of Cuyahoga county.....	9
“ “ Common Pleas Court.....	32
“ “ Circuit Court of the United States.....	0
“ “ Probate and Magistrates' Courts.....	24
<hr/>	
Total.....	74

CASES PENDING JANUARY 1, 1884.

In the Supreme Court of the State.....	13
“ “ District Court of Cuyahoga county.....	18
“ “ Common Pleas Court.....	160
“ “ United States Circuit Court.....	4
“ “ Probate and Magistrates' Courts.....	1
<hr/>	
Total.....	196

Of the cases pending on the first day of January, 1883, one hundred and four (104) were suits, including those for back taxes, in which money compensation was claimed for injuries to property and person through the alleged fault of the city. The amount claimed in these cases was distributed as follows:

In 98 cases for injury to property, the amount claimed was.....	\$321,231 76
In 6 cases for injury to person, the amount claimed was.....	27,055 00
Total.....	\$348,286 76

Of the cases commenced during the year 1883, sixty-one (61) were suits, including those for back taxes, in which money compensation was claimed for injuries to property and person through the alleged fault of the city. The amount claimed in these cases was distributed as follows:

In 57 cases for injury to property, the amount claimed was.....	\$152,803 48
In 2 cases for injury to person, the amount claimed was.....	11,000 00
Total.....	\$163,803 48

The total amount of damages claimed for injury to the property and person of litigants through the alleged fault of the city, in cases pending on the first day of January, 1883, and commenced during said year, is as follows, to-wit:

In 157 cases for injury to property, the amount claimed was.....	\$474,035 24
In 8 cases for injury to person, the amount claimed was.....	37,055 00
Total.....	\$511,090 24

SUITS FOR THE CITY.

The number of cases pending on the first day of January, 1883, and commenced during said year, brought by the city, was sixteen (16). The amount claimed in these cases was \$78,375.90.

SUITS TO RECOVER BACK TAXES AND ASSESSMENTS.

There were pending on the first day of January, 1883, and commenced during the year, seventy-five (75) cases against the present and former County Treasurers to recover back taxes and assessments collected by them for the city, involving the following amounts:

In 68 cases pending January 1, 1883.....	\$14,926 09
In 7 cases commenced during 1883.....	3,229 36
Total.....	<u>\$18,155 45</u>

Of the said seventy-five cases two were disposed of during the year. The amount claimed was \$300.39; the amount recovered was nothing.

AMOUNT SOUGHT TO BE RECOVERED IN CASES AGAINST
AND FOR THE CITY.

The amount sought to be recovered in various suits for and against the city, pending January 1, 1883, and commenced during that year, exclusive of injunction suits to restrain the collection of taxes and special assessments levied by the city, ejectment suits wherein only real property was sought to be recovered, and other suits wherein no pecuniary compensation is demanded, is as follows:

IN CASES PENDING JANUARY 1, 1883.

Against the city.....	\$348,286 76
For the city.....	63,249 16
Total.....	<u>\$411,535 92</u>

IN CASES COMMENCED DURING 1883.

Against the city.....	\$163,803 48
For the city.....	15,126 74
Total	<u>\$178,930 22</u>
Total amount sought to be recovered	<u>\$590,466 14</u>

ANALYSIS OF CASES DISPOSED OF DURING THE YEAR 1883.

The following cases embrace all cases disposed of during the year 1883, in which damages were sought to be recovered for injuries to the property and person of the complainants through the alleged fault of the city. These cases do not include suits for back taxes and are nineteen (19) in number.

AMOUNT CLAIMED IN ABOVE DISPOSED OF CASES.

In 15 cases for damages to property	\$15,977 09
In 4 cases for damages to persons	22,000 00
	<hr/>
Total amount claimed	\$37,977 09
Amount in hands of City belonging to, and recovered by the county	\$6,333 35
Amount recovered for damage to property	896 74
Amount recovered for damage to person	2,111 50
	<hr/>
Total amount recovered.	\$9,341 59

Cases involving \$896.74 of this amount so recovered being in the main cases in which the city was garnishee, have been taken to higher courts on error or appeal, for the purpose of reversing the judgments of the courts wherein such recoveries were had.

FIRE COMMISSIONERS' REPORT.

OFFICE OF THE BOARD OF FIRE COMMISSIONERS, }
Cleveland, Ohio, December, 31, 1883. }

To the Honorable City Council of Cleveland, Ohio:

GENTLEMEN: To continue an established custom, the Board of Fire Commissioners most respectfully submits its Tenth Annual Report of the Fire Department, embracing the financial condition, covering the aggregate receipts and disbursements, for the year 1883, with the report of the Chief, accompanied by the report of the Superintendent of Fire Alarm Telegraph, and as the expense incurred by printing these Annual Reports, has already been discussed by the members of your honorable body, it is designed to make this report as brief as possible. Therefore, the names of firemen, the history of engines, etc., will be omitted from this report.

MEMBERS OF THE BOARD IN 1882 TO APRIL, 1883.

F. G. KAUFHOLZ, President.
JOSEPH SLAGHT, N. WEIDENKOPF, J. D. SHANNON.
WM. H. KING.

MEMBERS OF THE BOARD FROM APRIL 1883.

J. D. SHANNON, President.
F. G. KAUFHOLZ, N. WEIDENKOPF, JAMES JOHNSTON.
M. A. GROSS.

A cordial vote of thanks was extended to Messrs. Slaght and King, upon these gentlemen retiring from the Board, for valuable services rendered the department.

Mr. Slaght served as a member five years.

Mr. King served as a member one year.

UNIFORMED FORCE.

The uniformed force of the Fire Department consists of one Chief, four Battalion Chiefs, one of which acts as Superintendent of Fire Alarm Telegraphs, eighteen Captains, nineteen Lieutenants, thirteen Engineers, thirteen Assistant Engineers and eighty-five firemen.

EMPLOYES.

One Veterinary Surgeon.

One Harness Maker, who also acts as fireman.

Three Operators.

One Line Repairer.

The force has been increased during the year by adding six men, as it was deemed expedient to repair the chemical engine and place the same in service. The experiment has proved, so far, satisfactory, as will be shown by the Chief's report, that it is a great auxiliary in extinguishing fires, during the first stages. When the funds will warrant it, an improved one should be purchased.

SCHEDULE OF SALARIES.

James W. Dickinson, Chief.....	\$ 2,200
Henry W. Rebbeck, Battalion Chief and Supt. of Telegraph.	1,785
Joseph Speddy, Battalion Chief.....	1,680
A. A. Cavanah, " "	1,575
Geo. A. Wallace " "	1,575
A. J. Spencer, Secretary.....	1,500
Eighteen Captains, each.....	1,008
Nineteen Lieutenants, each	840
Thirteen Engineers, "	1,008
" Assistant Engineers, each.....	840
Eighty-five Firemen, each.....	816
Three Operators "	900
One Line Repairer.....	816
One Harness Maker	840
One Veterinary Surgeon.....	250

The above schedule of salaries was fixed by the Board and approved by the Council for one year, commencing July 1st, 1883, and ending June 30th, 1884, and there was no opposition manifested on the part of the Council to adopting the schedule, as sent, as it was generally conceded that the firemen were not any too well paid for risks and exposures, hence the increase of five per cent. above the firemen's salaries of the previous year.

The record of casualties has been light during the year, and this department seems to be fortunate in being exempt from the loss of life to firemen at fires. The occupation of a fireman is a dangerous and perilous one, and like the soldier who marches to battle, he is not certain of returning alive.

We are pained to record the death of two of our respected firemen.

Albert H. Burger, a fireman in Engine Co. No. 8, after a lingering illness of several weeks, died February 7th, 1883, from the effects of having swallowed a piece of an oyster shell, which lodged in his stomach.

William A. King, a fireman in Engine Co. No. 9, suffered several weeks with the typhoid fever, and died August 12th, 1883.

APPARATUS.

The apparatus of the department consists of fifteen steamers, of which five are first sized rotaries of the Silsby manufacture; four of the second sized rotaries of the Silsby manufacture; two of the third sized rotaries of the Silsby manufacture; two of the second sized piston of the Amoskeag pattern; two of the third sized piston manufactured by C. Ahrens & Co.; five hook and ladder trucks provided with ladders, fire extinguishers, buckets, etc.; one Scott-Uda ladder; five four-wheeled hose-carriages; eighteen two-wheeled hose carts; eleven heaters; one delivery wagon; three heavy open-top buggies; three fuel wagons; two telegraph wagons; six exercise wagons, and one chemical engine.

AMOUNT OF HOSE IN SERVICE AND IN STORE.

NAME OF MANUFACTURERS	KIND.	No. of FEET.
Fabric Fire Hose Co., Warwick, N. Y.....	Cotton.	5,850
Eureka Fire Hose Co., N. Y.....	"	2,000
American Jacket Hose Co., Chelsea, Mass ..	"	50
Boston Jacket Hose Co., Boston, Mass.....	"	50
Gutta Percha and Rubber Mfg. Co., N. Y....	Rubber.	3,500
Cleveland Rubber Co., Cleveland, Ohio.....	"	5,960
Akron Rubber Co., Akron, Ohio.....	"	150
Boston Belting and Packing Co., 2½ Hose....	"	50
Caswell Manufacturing Co., 2½ Hose.....	"	50
Eureka Fire Hose Co., N. Y.....	Cotton.	50
New York Belting Co. ¾ Hose, H. & L. Co. 5..	Rubber..	200
Carbolized Rubber Hose in Store.....	"	1,500
		19,400

There were purchased in April, 1883, of the Gutta Percha Rubber Manufacturing Co., of New York City, 4,000 feet of carbolized rubber hose, at \$1.00 per foot.

The Cleveland Rubber Co. contracted to furnish 2,000 feet of their best brand of hose, to be delivered in March, 1884, as a settlement to all previous contracts. There were 88 sections of the Cleveland hose burst during the year, 250 feet burned and 23 sections repaired and 100 feet condemned.

Carbolized hose, 10 sections were bursted and 50 feet condemned.

Of the fabric hose 9 sections burst, which were immediately repaired, and 100 feet were burned. 150 feet of Akron hose burst, and 100 feet of linen.

The total loss of hose during the year was 4,000 feet.

FIREMEN'S RELIEF FUND.

A law was created in 1881 for the benefit of disabled firemen, and in October of the same year, the Board of Trustees, which by the law consisted of the Mayor and the Board of Fire Commissioners, organized by selecting Mayor R. R. Herrick as president, and A. J. Spencer as Secretary. There being no pensioners drawing from the Fund, no more meetings were held until August 18th, 1882, when a claim was presented by the family of John T. Gillson, captain of H. & L. Co. No. 2, who died April 10th from the effects of inhaling sulphuric gas while at a fire. March 29th, 1883 the law was amended, which prescribes that the Board shall consist of the persons who from time to time comprise the Board of Fire Commissioners and two members of the department, to be elected by the members of said fire department. On April 28th, 1883, an election was held in accordance with the law, and Captain Wm. Long, of Engine Co. No. 4, and Wm. H. Clayton, engineer of Engine Co. No. 3, were chosen to serve as members of said Board of Trustees of the Firemen's Relief Fund one year, and the President and Secretary of the Board of Fire Commissioners are by the law made President and Secretary of the Board of Trustees of the Firemen's Relief Fund.

MEMBERS IN 1883.

JAMES D. SHANNON, President.
MILTON A. GROSS, Council Member.
JAMES JOHNSTON, Citizen Member.
F. G. KAUFHOLZ, Citizen Member.
N. WEIDENKOPF, Citizen Member.
WM. LONG, Department Member.
WM. H. CLAYTON, Department Member.

The Board decided to allow the family of Capt. Gillson, deceased, which consists of Mrs. Helen M. Gillson, Frank Gillson and Helen Margaret Gillson, who are entitled under the amended law to receive the sum of twenty-five dollars per month.

September 21st, 1883, Maurice Price was retired from the Cleveland Fire Department, because of physical disability, caused by a serious injury to the spinal column in 1881, while in the line of duty. He was placed upon the pension fund at \$40 per month.

There is also in the department a Relief Association sustained by monthly dues from firemen and donations from parties who desire to recognize the efficiency of the officers and men in fighting fires. The members of this Association desire the Secretary in this report to express their unqualified thanks for liberal donations received from various persons and firms, who have sustained losses during the year. This Association has paid out since its organization in 1868, \$29,500, and in 1883 \$1,760 were paid for 80 sick claims.

It will be rembered that February 3d, a fire broke out at the Standard Oil Works on Broadway and Kingsbury Run. This was the most disastrous fire during the year. The department as usual received the congratulations of our citizens for its untiring effort to save for the company its property, and the company appreciated the work done by a liberal contribution to the relief fund. On account of the very high waters at the time, the burning oil floating upon the surface threatened the whole city, but the skill of experienced officers and the continued efforts of the men prevented the spreading of the fire beyond the works.

CHIEF'S REPORT.

To the Honorable Board of Fire Commissioners :

GENTLEMEN:—I have the honor to submit herewith the report of the operations and actions of the department for the year ending December 31st, 1883.

The department has responded to four hundred and forty-two alarms of fire, thirty-one hundred nineteen and three-quarters miles run, ten hundred and eighty five hours worked, as will be shown by the following table.

Companies.	No.	No. of Fires Attended.	No. of Miles Run.	No. of Hours Worked.

“ “ “ “.....	5	30	88½	15½
Chemical Engine.....		114	147	26
Total.....		442	3,119½	1,085

The department has made four hundred and sixty-five inspections in the mercantile and manufacturing districts, and there have been one hundred and ninety-eight dangerous places made safe. The old adage "An ounce of preventive is worth a pound of cure," is clearly demonstrated by the time devoted to these inspections.

I have caused the school buildings, churches, public assembly halls, theaters and hotels, to be inspected, and fire escapes to be put up, and proper exits to be made, and doors to swing out, to conform with the State Law.

There have been one hundred and twenty-five escapes put up during the year. Thirteen persons were burned by carelessly handling gasoline, one of whom was fatally burned.

The attention of the Board is called to the actual need of water in the outer districts, and the Water Works Trustees should be consulted, and if possible, induced to place more hydrants in the center of the city, and I would suggest a different hydrant, with independent shut offs, for each opening.

The necessity for more fire apparatus is apparent to all, and should receive immediate attention, or something very serious may result from neglecting so important a consideration. Some of the apparatus is getting old, and ought to be replaced with new.

It affords me pleasure to state that the discipline of the department has been kept up to its usual standard.

I desire to express my gratitude to his honor the Mayor, the Board of Fire Commissioners, and to all with whom I have had official dealings, for courtesies extended to myself and associates during the year, and in conclusion I desire to return my sincere thanks to the Battalion Chiefs, to the company officers, and to the members of the department for their promptness and zeal shown in the discharge of their duties, and for the successful workings of the department.

Respectfully submitted,

J. W. DICKINSON, *Chief.*

VETERINARY SURGEON'S REPORT.

To the Honorable Board of Fire Commissioners, through Chief Dickinson:

I respectfully submit, for your consideration my report since my appointment to the Department, up to date:

There are at present seventy-five horses in the Department, all of which are fit for service, with one exception.

I have been called upon to attend to one hundred and ten different cases, with very satisfactory results, excepting one case, that horse succumbing to paraplegia.

The general condition of the Department horses is all that could be expected, and a long continuance is sincerely hoped for by the undersigned.

Respectfully,

JOHN CROTTY.

Respectfully forwarded,

J. W. DICKINSON, *Chief.*

FIRE ALARM TELEGRAPH.

OFFICE OF THE FIRE ALARM TELEGRAPH, }
December 31st, 1883. }

To the Honorable Board of Fire Commissioners :

GENTLEMEN :—In accordance with the rules and regulations of the department, I have the honor to submit my Annual Report in detail, for the year ending December 31, 1883.

During the year there have been four hundred and twenty-three alarms from boxes, fifty-six still alarms and twenty-eight special calls received in this office and transmitted to the department.

The system consists at present of seventy-five circuits, with alarm boxes and receiving instruments, in the same circuits both fire and police stations, and I would suggest a change made that would be more reliable.

1. There ought to be constructed three new circuits No. 8 gauge galvanized wire, these circuits to connect with the fire and police stations only, and that all the receiving fire alarm instruments be placed in these circuits. By this arrangement the fire lines could be kept separate, and the alarms would not be delayed on account of troubles on the lines, as often occurs under the present system, and the tapping on the fire-gongs would be greatly diminished, so that when these gongs were struck, the members of the department would be more prompt in responding.

With the present arrangement some of the lines are constantly in trouble, because of so many telegraph, telephone and other lines being strung through the city, and it is a very difficult matter to keep the lines clear, especially in stormy and bad weather. Therefore, I would most earnestly suggest that the attention of the Council be called to the necessity of placing telegraph, telephone, electric light and electric power wires underground, as in some other cities.

2. I would suggest that the alarm or twelve taps preceding the number of the box be taken out, and the instruments made to run faster and give the number of the box or station only. This would be, in my judgment, a great improvement to our system. The city has grown to that extent that our present system is not as serviceable as in the past.

You may ask, "Why not use the present talking circuits for the bell circuits?" I would say that this is only in two circuits and old, being constructed in 1869, and is good enough for what it is now used, and will be for some years; besides, it would cost almost as much to rebuild those lines and put them in proper shape, as it would to construct the new lines.

The same instruments that are now in use in the fire and police stations can be used by adding another relay and key in the new circuits.

During the year there have been ten new alarm boxes put in circuit, one of which was purchased by the Britton Iron and Steel Co. The department run wires to the works and connected it in circuit, making one hundred and eighty-four fire alarm boxes. The alarm in the office is known as box 2, making a total of one-hundred and eighty-five fire alarm stations.

The telephone on the viaduct has been serviceable, as the watchmen have notified this office of a number of fires which have occurred on the flats.

The locks on all the alarm boxes have been changed into trap key locks. The old keys have been collected and new ones have been issued, as follows: To the Fire Department, 157; to the Police Department, 250; to the Merchant Police, 6; to the Cleveland District Telegraph, 1; to house holders, 340; to citizens, 90. The Commissioners and Officers of the Department are supplied with release keys. I would suggest that signs be placed over each box, showing the location of the keys, as most of the unknown key holders have changed their keys and been supplied with new ones.

The Fire Alarm Office and apparatus have been removed from room 13 to room 14 in the City Hall, which has been fitted up and is more convenient for the wires and much less annoyed by the noise from the street.

The condition of the fire alarm wires is good, with the exception as follows: South of Euclid avenue, west of Wilson avenue, north of Kingsbury Run to Broadway and Sheriff street to Euclid avenue; the wire in that district is old, and mostly on house tops, and should be replaced with new wire on poles.

The plain steel wire which was put up in the 18th Ward in 1874 is also not reliable and should be replaced with new.

The amount of wires strung in the city, is about as follows: Fire line, 150 miles; talking line, 35 miles; police line, 35 miles; and all the telephone lines out of this office, 75 miles; total 295 miles.

WIRE STRUNG ON POLES AS FOLLOWS:

CITY.	WESTERN UNION.	ATLANTIC & PACIFIC	AMERIC'N UNION.	MUTUAL UNION.	TEL'PH'NE Co.	POSTAL.
1 205	122	115	180	132	180	28

The Telephone Company has wire on 751 city poles, and the Western Union has wire on 30 city poles.

The West Side is connected by cable under the river, and previous to 1873, considerable trouble was experienced with vessels dragging anchors, which pulled up the cables. In 1873, a three inch pipe was laid across the river at the foot of Ohio street, and a cable was draughted through it. At present the pipe has one ten wire cable in it, in good working order. The Telephone Company has two twenty wire cables in it, and this company has erected two new cable houses, one at each side of the river, as the old ones were badly damaged and worthless. This system of laying a cable across the river was so successful that in 1878 a six inch pipe was placed across the river at the foot of Superior street. The Western Union Telegraph Co. paid half of the expense of laying the pipe, built the two cable houses and furnished the city with the necessary cables. At present the company has two fifteen wire cables through said pipe and the Telephone company has two thirty wire cables through. The Telephone company supplies this department with twenty-five sets of telephones, free of rental, and the Manager, G. W. McKinstry, is very courteous and extends every reasonable favor desired, exchanging instruments, &c., when out of order.

The annexed tables will show the number of alarms struck each hour, and each day of the week, and boxes from which the alarms came.

I have prepared a list locating the boxes and giving the names and residences of key holders, which I would suggest be printed on cards for distribution.

Respectfully submitted.

H. H. REBBECK,

Supt. Fire Alarm Telegraph.

The oft-repeated expression that "*the fire department is a department of emergencies*," is becoming almost as popular as Shakespeare's character Polonius, who accuses Hamlet of "*Still harping on my daughter*."

This Board is well aware that each member of the City Council sees the actual necessity of affording more and better facilities for protecting our citizens against a devastating conflagration, which is liable to occur at any time. A number of instances have already occurred, when, had another fire broken out at the time nearly all the apparatus and companies were employed, untold damages would have been the result. Other cities have learned by experience to make ample provisions to guard against loss by fire. New York, Chicago, Buffalo, Boston, St. Louis, Cincinnati, &c., have well regulated and efficient departments, and almost every request made in these cities for more men or improved apparatus is readily granted. This Board has no cause to complain for courtesies extended by the City Council, for all requests have been promptly granted; but the Board has been prohibited from making necessary requisitions on account of the crippled condition of the fund. And yet there seems to be no one to blame for this depleted condition, for there is a certain amount of tax levied, and this department shares with the rest.

In view of the large increase to the Police and General Funds from the benefits derived from the "Scott Law," it is expected that the next levy will be so apportioned as to give to this department a sufficient amount to satisfy largely the demands made upon it "*for better fire protection*."

The insurance companies have already become alarmed and threaten to inflict upon our citizens a greater rate of insurance. They have learned that some of our engines have been in service more than fifteen years, (and ten years is the life of a boiler.)

Quite a number of hose carts need to be replaced with new ones, as some of them have been in service since the depart-

ment was organized. This old apparatus is constantly getting out of repair, and requires quite a sum for that purpose alone. The boilers in engines Nos. 7 and 13 have been burned so much as to render them almost useless. The influential citizens are making strong demands for more engine companies, and these petitions ought to be considered and if possible some means devised to meet these necessities.

An estimate was made for expenses during the year, of \$186,000, and to this amount was added \$20,000 to establish a new company. The receipts from taxes amounted to \$158,370.82, and the expenses \$166,583.55. It was found necessary before the year closed, to ask that the fund be augmented by \$5,500, and this request was cheerfully granted by a transfer from the Market Fund.

This increase of expenses above those of 1882, was caused as follows:

Services by increasing the number of men and five per cent. raise on firemen's salaries.....		\$12,704 17
Repairs on Chemical Engine.....	280 37	
Additional expense by putting Chem. in service.....	633 00	
One new wagon.....	175 00	
Telegraph Instruments, Alarm Boxes, Register, Galvano- meter, &c.....	1,795 72	
Paving.....	987 15	
Painting the several houses.....	949 00	
		<hr/> \$17,524 41

It will be observed that it requires about \$165,000 for ordinary expenses, as the department now exists, yearly, and extraordinary expenses cannot be estimated, for the loss of an engine, hose, horses, carts, &c., is liable to occur at any time, and as we have before remarked, it is wisdom to prepare for these emergencies, and a surplus of \$15,000 is not too great.

By order of the Board,

A. J. SPENCER, *Secretary.*

THIRTEENTH ANNUAL REPORT
OF THE
Directors and Superintendent
OF THE
WORKHOUSE
AND
HOUSE OF REFUGE AND CORRECTION,
TO
THE CITY COUNCIL OF CLEVELAND,
FOR THE YEAR 1883.

To the Honorable the President and Members of the City Council:

GENTLEMEN:—I have the pleasure herewith to present to your Honorable body, this, the Thirteenth Annual Report of the Board of Directors and Superintendent of the Workhouse and House of Correction and Refuge, together with the Report of the attending Physician, being for the year closing December 31st, 1883, and beg to call your careful attention to the facts, figures and suggestions therein contained, and request that the same be ordered printed in pamphlet form.

By order of the Board of Directors.

Respectfully submitted,

W. D. PATTERSON,

Sup't and Sec'y.

Ordered printed, Feb'y 18, 1884.

Officers.

BOARD OF DIRECTORS.

Physician,
DR. P. H. SAWYER.

DIRECTORS' REPORT.

1907

REPORT OF THE DIRECTORS.

To the Honorable Mayor and City Council of the City of Cleveland, Ohio:

GENTLEMEN:—It is with pleasure we submit for your consideration and inspection the Thirteenth Annual Report of our able Superintendent of the Work House and House of Correction. This Report seems to be so full and complete, there is but little left for the Directors to say. However, we will venture a few remarks and suggestions.

We had in the treasury January 1, 1883, \$20,361.08 and deposited during the year \$80,640.10. Received from tax levy during same time \$16,243.16. Making \$117,244.34.

And drew warrants against the same during the year \$106,478.25, leaving to the credit of the House January 1, 1884, \$10,766.09, out of which our December bills are to be paid, amounting to \$6,893.20, leaving a balance of \$3,872.89.

Our financial condition is not to our liking. We are a manufacturing establishment without capital, and are working on credit with short means, and the result is we have to go into the market to buy from whom we can, and the best we can on credit, and you can readily see that our raw material and supplies cannot be bought as cheaply on time as for cash.

Therefore we would advise and recommend the city to furnish this institution, at an early day as practical, a working capital of not less than \$50,000. We understand this plan is adopted in other cities, and as far as we can learn proves a success, and at the same time removes the embar-

rassment of the directors asking for money so often from the City Council.

We have in the Workhouse (54) more prisoners than at same date the] previous year. Please refer to the tables Superintendent's report.

HOUSE OF REFUGE.

We have in this House seventy-two (72) children more than the previous year, and a good many of them so young they hardly know why they are sent to the House of Refuge. This increase is largely due to our courts committing to the House of Refuge children for no other cause than running away from school or home. This condition of things should not exist, and instead of the courts committing this class of children to the House of Refuge, they should compel their parents to take these children home and give them better care.

The school under Mr. McBane and lady teachers, Mrs. Doty and Mrs. Worthington, have done good and satisfactory work.

The health of the people in our institution for the past year, has been all we could ask, under the watchful care of Doctor Sawyer, and to his report we refer you.

We cannot close our report without a word for our Superintendent and Matron, Mrs. Patterson, with the co-operation of the Deputy, Mr. McIntosh. The business and the affairs of the institution have gone pleasantly, harmoniously, and very satisfactory to the Directors.

The discipline of the inmates has been good, and at the same time the prisoners have been treated humanely, and allowed all the privileges it was possible to give them.

The domestic part of the house has been orderly and scrupulously clean, which has added not only to the comfort, but to the health of the inmates, all of which is due to the indus-

try of the Matron, and at the same time Mrs. Kennedy, the Matron over the girls' department, is worthy of praise for the management of the girls under her charge.

Respectfully submitted,

L. F. BURGESS,
S. M. STRONG,
GEO. H. WARMINGTON,
S. BUHRER,
R. E. MIX.

Superintendent's
REPORT.

SUPERINTENDENT'S REPORT.

CLEVELAND, OHIO, January 1, 1884.

To the Honorable Board of Directors of the Cleveland Workhouse and House of Refuge and Correction:

GENTLEMEN:—As is my duty under the act of incorporation, establishing the Workhouse, I have the honor herewith to submit this, my twelfth annual report, being for the year closing December 31, 1883. This being the thirteenth annual report since the opening of this prison.

The Workhouse was duly organized and put into operation early in the year 1871. The first prisoner was admitted March 3rd of that year, (he being the veritable John Smith),

The building are large and commodious, and on completion were thought by many to be quite too large for the necessities of the city. But experience has demonstrated that they were quite too small for the growing demands of the city, for since that time large expenditures have been made from time to time in the erection of additional cell room, for both males and females. Also shop and store-room; and in the House of Refuge doubling the sleeping room for boys, and the erection of Home of Refuge building for girls. These improvements have cost the city about forty thousand dollars. Buildings have also been erected for boiler and engine room and coal house. New engine and new boilers, costing, in addition to the foregoing, close to fifteen thousand dollars.

Of the original buildings, especially the administration and the main prison buildings, the exterior is an exhibition of skill and good taste, and well calculated to show to advantage architectural ability.

Observation has led us to the conclusion that in the erection of prisons, and other public buildings, there is more labor and skill of the architect set forth in the outward embellishments, than there is to the internal, and practical wants and necessities—the most important of which are, ventilation, heating, cell room, hall capacity, cooking and laundry accommodations, water supply and sewerage—all of these are the essentials, and are of the first and most vital importance in the construction of prison buildings. Exterior adornment is of secondary consideration. A prison building outwardly should be plain, representing strength, durability, and permanency in all particulars, while internally it should represent security, convenience, and humane considerations for the health of its occupants.

A workhouse Webster defines as “A house in which idle and vicious persons are confined to labor,” and is evidently based on the supposition, that those committed thereto are capable of performing manual labor; the labor is inflicted as a punishment for wrong doing. But the facts are, that many of those sentenced to this workhouse are unfit, when received, to perform any kind of labor, by reason of age or infirmity, who are broken in health from dissipation or debauchery. Thus in many cases the ends of justice are defeated—from an inability to comply with the conditions of the sentence.

We question much whether it was ever intended, or expected, in the establishment of workhouses, or State prisons, that they should, or could, become money making institutions from the labor of the convicts committed, and yet every offender against the laws of the land, when committed to penal servitude, should be compelled to contribute to his or her support, the condition of health permitting.

When we consider the kind and character of the labor sent us (for we have not the selecting of our workmen as other manufacturers have), and that it comes through and from ignorance, and vice, and idleness, and dissipation, for they are all intimately associated, it will at once be seen that a great portion of such labor is unreliable as to kind, and doubtful as to character. We regard all enforced labor as doubtful in its

results. It will be inefficient because it is involuntary, and it must be unreliable and uncertain because of the short time sentences, and the doubt as to fines (many of them being very small), whether they are to be paid in cash or labor. From these considerations it should not be expected that this prison should become a source of revenue to the city. In fact, it is unreasonable to expect that we should do more than to contribute in part to our own support. This is and has been our object and aim in the past, and to this purpose we are devoting our best energies.

Late in the year a system of grades and classification was inaugurated in the prison, looking to a bettering of the condition of the prisoners, and a better and more harmonious system of discipline. Thus far the system of grades is more than meeting our highest expectations. Our system of classification is not so perfect, and cannot be, from the crowded condition of cell buildings and shops, and yet the change is a success, and serves as a great incentive to industrious habits and good deportment, and inspires a laudable and praiseworthy ambition to pass up from the lower to the higher grades, where additional advantages and privileges are enjoyed.

POPULATION.

The year opened with two hundred and sixty-three (263) in confinement, in this prison. Of these two hundred and fourteen (214) were males, and forty nine were females.

During the year fourteen hundred and sixty-eight (1,468) persons were received, of whom twelve hundred and four (1,204) were males, and two hundred and sixty-four (264) females. During the same period fourteen hundred and fourteen (1,414) persons were discharged; of these, eleven hundred and fifty-nine (1,159) were males, and two hundred and fifty-five (255) were females, leaving at the close of the year, remaining in the prison, three hundred and seventeen (317) persons, of whom two hundred and fifty-nine (259) were males, and fifty-eight (58) were females, being fifty-four (54) persons more than at corresponding date the previous year.

Since the opening of the prison, in March, 1871, there have been received thirteen thousand and three hundred (13,300) prisoners. Of these, ten thousand six hundred and seventy-five (10,675) were males, and two thousand six hundred and twenty-five (2,625) were females.

Of the whole number committed the records show that the larger portion were committed for intoxication and for offences growing out of the use of intoxicating drinks.

There is a very great and apparant inconsistency on the part of State or Municipality, providing by law, or ordinance, a tax or license for the sale of intoxicants, and then by the same power creating laws, or ordinances, providing expensive and costly machinery in the way of police regulations, police courts and prisons for the punishment of such offenders as have indulged too freely in that which (sold under the sanction of the law) disturbs if not destroys the brain, takes away reason and makes the victim *drunk*. The law makes this an offense, while in this condition the individual may steal, may be guilty of house-breaking, abuse of wife and children, may commit all grades of offenses, and even murder. Then after the mischief has been done, or some great crime committed, the same law-making power steps in, through the agents of the corporation, the offender is brought before a court to answer for his or her misdeeds, the case is patiently heard, and if found guilty the prisoner is sentenced to the Work-house, the sentence varying somewhat according to the magnitude of the crime committed, from one dollar and costs up to fifty dollars and costs, and in some few instances even greater sentences are inflicted. After serving the sentence thus imposed the prisoner, once more free, goes out into the city again, and finds the same pit falls and snares open before him or her, and they fall. The expensive machinery is again called into requisition for their arrest, trial, conviction and imprisonment, and thus the process goes on from day to day, week to month and month to year, until, as the records show, the same individuals have been incarcerated in the Work-house from one to thirty times for intoxication and other petty crimes as the result of strong drink; and yet while the

offences are multiplied and repeated, over and over again, there is no increased penalty imposed for such violations of law. Such a system of penalties for violate law is little better than a *broad farce*. And I submit whether there is any good reason to hope for reformation, or cure, under such a system, and that the sooner more wholesome and wise legislation is placed upon our statute books for the suppression of intemperance and its concomitant evils, the better for the offender, for society, and for the over-burdened taxpayer.

In my last report I recommended for all such prisons as this one, the Indeterminate Sentence System, and this, too, I would apply to prisoners who are committed to the State penitentiary, excepting life convicts. Such a system of sentences, with the parole, or probationary discharge, must in the very nature of the case result in good to the offender, and if in good to him then it follows in good to the community.

As to the correctness of such a system I am not changed since my last report; and yet I know there are objections to such a system, though in its provisions it may be wise and humane. What is wanted is a system best calculated to work the reformation of the wrong doer. If the present "Short Sentence System" has proved a failure in the work of reformation, as we have shown, and if the Indeterminate Sentence System is objectionable, why not try the "Cumulative Sentence System," which is less radical than the Indeterminate Sentence, and ought to commend itself to the philanthropist and law abiding citizens as possessing the elements of reformation and the ultimate reclamation of such offenders as habitual drunkards, vagabonds, vagrants and thieves. For this class of offenders and such as are sentenced to the Workhouse for all petty offenses, I would suggest such legislation as would bring about the following Cumulative Sentence system.

For the first offence, sentenced at the discretion of the court; second conviction double the first sentence, both as to time and fine. Third conviction, double the second sentence both as to time and fine; and if after a third offense and conviction, there is no reformation and the offender is

convicted for a fourth time, then the indeterminate sentence system should apply. Assuming that the offender for the first, second and third conviction, has not been cured, then it would seem wise and proper that some other system of imprisonment should be administered, and there is no system yet suggested so likely to produce lasting results, and to work wondrous cures, as a certainty of punishment after offending, and that punishment based upon the reformation of the individual, whether that reformation be demonstrated to the prison authorities, in six, nine or twelve months, or in two, three or five years. Such a course would tend to the bettering of the condition of the imprisoned, physically, mentally and morally, and while it would be for the future well being of the prisoner it would be financially better for the citizen and taxpayer. When we consider that many of the habitués of this prison have already been convicted from one to ten, fifteen, twenty-five and even thirty times and no apparent cure effected in their case, is it not time to abandon the old and expensive system of re-arrests, trials and convictions, and conveyance to the Workhouse, and substitute therefor a system less expensive, more humane and with infinitely greater promise of good results to the unfortunate prisoner, and to the city at large. We have about arrived at this conclusion, that there can be no reformation where the offender is sentenced to ten, twenty or thirty days, or by the imposition of fine and costs, that will not detain the individual beyond ten, twenty or thirty days.

INEQUALITY OF SENTENCE.

The great disparity in the sentences imposed for drunkenness and other petty offenses, in our Police Court, is not calculated to convince the prisoner that justice has been meted out with exactness and careful discrimination, nor to produce acquiescence and resignation to the decree on the part of the offender. For example, an old offender whose previous sentences to the Workhouse number above five, ten, twenty, or even up to thirty times, has pronounced upon him thirty days, or two

dollars and costs, or three, or five dollars and costs, as is often the case, while a new offender for the first time sentenced receives thirty days and ten dollars and costs, or as has been the case twenty-five dollars and costs upon the same charge. Again a suspicious character has received thirty days and fifty dollars and costs, while others with the same charge resting against them are mulct to the tune of thirty days and twenty-five dollars and costs, or even less in some cases. Vagrants have had meted out to them for their vagabondage, ten dollars and costs, thirty days and costs, thirty days and twenty-five dollars and costs, and twenty-five dollars and costs without a time sentence, while a common beggar has been sent up for thirty days and twenty-five dollars and costs, thirty days and ten dollars and costs and even as high as fifty dollars and costs for the *very grave* offense of asking for bread. While frail ones charged as common prostitutes, have been treated to twenty-five dollars and costs, and thirty days, and up to fifty dollars and costs and thirty days.

I must not be understood as casting any reflections upon the court, present or past, but a presentation of the facts, in the administration of law, and its apparent inequalities in the inflictions of sentences upon offenders resting under the same charge;—and we find this same inequality in sentences as pronounced by our higher courts in this and other States, a convicted felon in one county may receive one, two, three or more years for a specified offense and in another county or another State for the same crime be committed for a term of three, five or ten years. These facts and criticisms are *not against the courts*, but against a *system of laws* that in their administration are so *flexible* as to allow so much *latitude* and apparent *inequality* and *injustice* in the penalties imposed.

FINANCIAL.

We commenced the year with		
Cash in the City treasury,	-	\$20,361 08
“ deposited by Sup’t for the year,		80,640 10
“ Net from tax levy,	- -	16, 243 16
<hr/>		
Total fund for the year,	-	\$117,244 34

Bills were audited and paid during the		
year, by warrants drawn upon the		
treasury by the City Auditor, to the		
amount of	- - -	106,478 25
<hr/>		

Balance in treasury	- -	\$10,766 09
---------------------	-----	-------------

To start the new year, with the December bills amounting to \$6,893 20 unpaid, which will leave only the sum of \$3,872-89 in treasury. In this connection it may be proper to state that by the system of auditing and paying claims by city ordinance, the December bills of each year are not paid until in the ordinance for January of the following year. This is a matter over which this management have no control.

It will be remembered that the only labor in this institution from which any return comes into our treasury, is the manufacture of brushes, and, as we have already shown, the product of such labor is and must be inadequate to the carrying on of an institution of such magnitude.

In addition to the foregoing, the shoes for the prison, in part are made by such skilled workmen in that branch as may be at our command. And also the clothing for the institution in part, but from such labor, while it is an actual saving to the prison it does not bring any financial return.

Our financial status may be summed up as follows : Boarding of State case prisoners has for several years been refused by the County Commissioners. The time was when this was considered a legitimate part of our revenue. The fines and costs at one time in City cases, collected at this

office went to the credit of the Workhouse fund, now by city ordinance they are paid into the city treasury to the credit of the Police Court fund.

Fines and costs in State cases collected at this office, have for some years been placed to the credit of the Workhouse fund as paid over into the city treasury. Upon examination of the law by the County Prosecutor and the County Commissioners, it was thought that the county was entitled to this fund and they have insisted upon the refunding, by this institution of the amount thus collected, amounting in the five years past, up to December 31, 1883, to the sum of \$18,476.33, and which the Supreme Court says is a legal claim against the Workhouse and must be paid.

AID FROM TAXATION.

The following summary will show to what extent and in what amounts this institution has been assisted by a tax levy during the past six years.

1878, Tax levy asked for,	\$15,000 00,	Realized	\$13,000 70.
1879, Tax levy asked for,	22,000 00,	Realized	14,207 27.
1880, None asked for,	_____	None,	_____
1881, Tax levy asked for	\$25,000 00	Realized,	_____
1882, Tax levy asked for	20,000 00	Realized,	16,243 16
1883, Tax levy asked for	25,000 00	Realized,	_____
	_____		_____
	\$107,000 00		\$43,451 13

From the foregoing it is shown that requisitions or demands have been made upon the city authorities in the six years past for the sum of one hundred and seven thousand dollars, by a direct tax levy to aid this department of the city government, and that all that has been done in answer to such requisitions amounts to the sum of forty-three thousand, four hundred and fifty one dollars and thirteen cents.

It is further shown that in the past four years, this institu-

tion has cost the city, by a direct tax the sum of sixteen thousand, two hundred and forty-three dollars and sixteen cents, and that from this and the other revenues of the institution, we have had to keep up repairs to the buildings and machinery, to make necessary and permanent improvements, keep up the supply of raw material for manufacturing purposes, and to meet all current expenses, salaries, &c. We find this fund entirely inadequate to meet all these outlays, that should be made annually, *now* that the buildings are growing old and are requiring annually large outlays to keep them in proper repair.

PERMANENT PROVISIONS.

The City Council, whom we believe are all interested, as well as all good citizens, in the success and welfare of the Workhouse, as well as all other city departments, should annually provide by a *direct tax*, a sum sufficient at least to pay all salaries and to make permanent improvements and repairs, and thus aid the Workhouse in its support, and carrying forward its industries and its highest success.

We should not be placed in the *uncomfortable and humiliating position* of supporting a great institution and conducting a large manufactory, with a depleted treasury and an inability to meet obligations, or to take advantage of the markets in the purchase of supplies, or stocks, as other *manufacturers and merchants* are accustomed to do. Nor should the authorities appointed over the institution and charged with its oversight and care *suffer the mortification* when asking for aid, to meet with a *refusal*. But the city should at once place the institution upon a solid financial basis, by providing for its annual and recurring wants, as before indicated.

As we consider the subject of financial support, why would it not be a proper and legitimate distribution of the Scott law tax, to set aside a part of the same for Workhouse purposes. This would seem the more appropriate from the fact that there is no place to which such license or tax fund more legitimately belongs than to the City Infirmary and the City Workhouse. These institutions are charitable and correctional. The

former, for the poor, infirm and sick; the latter for the profligate, vicious and the criminal, and for the drunkard and all crimes that are the *legitimate outgrowth of intemperance* we should insist upon a portion of this license fund or tax being our legitimate inheritance.

HOUSE OF REFUGE. §

In our last report we said of this department, that it was gradually *decreasing* in numbers. Now we have to report a change, for the year. There has been a steady *increase* in numbers. It must not be inferred from this showing that the youth of the city were under better home care, the previous year than during the one just closed. Nor must we conclude that a worse condition of depravity existed the last year, among the children of the city, than in the year previous. The facts as they exist, are not so much in the *wayward* or *vicious children* themselves, and their wrong tendencies, as in the estimate placed upon the House of Refuge as a reformatory and corrective agency, as existing in the mind of the Court.

The year commenced, as the tables will show, with a family as follows:

	BOYS.	GIRLS.	TOTAL.
	79	16	95
Received during the year.....	116	12	128
Whole number.....	195	28	223
Discharged.....	49	7	56
Remaining Dec. 31st, 1883.....	146	21	167

The increase, and again the decrease for the various years since the opening of the Refuge, will be shown by the following table giving number remaining at the close of each year:

1871	Remaining at close of year	25
1872	" " "	59
1873	" " "	83
1874	" " "	120
1875	" " "	161
1876	" " "	168
1877	" " "	89
1878	" " "	76
1879	" " "	106
1880	" " "	121
1881	" " "	101
1882	" " "	95
1883	" " "	167

The schools have continued throughout the year, without intermission, under the supervision of Mr. Alex. McBane, and the same lady teachers as at last report, Mrs. Emma Worthington and Mrs. Dora Doty, whom we regard as faithful and competent, and devoted to their work.

I cannot too strongly condemn the sending of young children to the Refuge, for incorrigibility, whose ages vary from seven to ten years.

By order of the Board of Directors, made in December, 1880, the schools were re-organized, graded and classified, as follows: Freshmen, junior and senior. This was a move in the right direction, and has been productive of great good in the educational work, inspiring a worthy ambition among the children, and conducive to good discipline and harmony in the workings of the department.

All children on admission, are assigned to the freshman grade. The year is divided into three school terms, of four months each. At the close of each term, an examination is had of all the grades, to determine the standing of each pupil, both as to proficiency in their studies, and deportment, and upon merit alone are they promoted from the lower grades to the next higher. Upon reaching the senior grade, and a satisfactory examination, and deportment being commendable, they are recommended to the Board of Directors for a final discharge. Should any pupil fail to pass the requisite exam-

ination, they are held for another term, of four months, and the same through all the grades.

The branches taught are such as are calculated to afford a practical education, and to qualify for the activities of life, viz.: Spelling, reading, writing, arithmetic, geography, vocal music, history, physical geography, book-keeping and physiology. Though we may not be able to horoscope the future lying out before these children, as to what the result shall be, we rest under the conviction that the agencies here employed for their education and reformation, must make an impression for truth and morality, that will be permanent and lasting. Any system of so-called reformation that ignores the education of the *heart and head* is wrong in principle, and is as building upon the sand.

It has been, and is to-day a source of complaint, on the part of many of our best citizens, of the very close association between the Workhouse and House of Refuge, as now situated, and the great danger there is of the contamination of these children, by Workhouse influences, for it holds good here, as elsewhere, that "evil communication corrupts good manners."

As far back as 1875, the evils of this close proximity and apparent association, and the urgent necessity for a change from the present location to a farm, were presented by this Board of Managers to the City Council, and was also urged in the Annual Report of the Superintendent, to the Board, in which he says: "I am glad to know that this subject has already claimed your attention, and that the subject has been presented to the City Council, and that action has already been taken by that body, looking to the early purchase of a farm, etc."

In reports of 1876, the Board say, in presenting this subject to the City Council again:

"We feel it to be our duty, therefore, to urge upon your consideration the necessity of perfecting, as soon as possible, the project already adopted by your honorable body, of purchasing the requisite quantity of land, in or near the city, and erecting thereon suitable buildings, to which the youth of the Refuge department can be transferred, and thus not

only make ample room for the adult convicts at the Workhouse, but entirely remove the youth from its impure atmosphere and unfavorable influences."

The Superintendent says in same report to the Board: "We hopefully look forward to the day, not far distant, when a farm shall be provided, and the necessary buildings erected, having all the requisites for such a home, in the way of light, fresh air and heat, and an abundant and never-failing supply of good water; all of which are of vital importance in insuring and promoting the health of those who may be its occupants."

The same subject was discussed in the reports of the Board and the Superintendent, in 1877. And again in 1881, the Board of management say: "While we agree fully with the foregoing, yet, in the judgment of the Board, legislation should be obtained, at no distant day, looking to the separation of the House of Correction from the Workhouse."

In same report to the Board, the Superintendent says: "An early separation of these combined institutions, could not but work to their mutual advantage."

Thus it will be seen that the management, for years, has raised its voice against this existing evil. It has been presented from moral considerations, from an over-crowded condition, as a necessity for more room, play ground and outdoor exercise, and considerations of humanity and religion, and yet the long sought-for relief has not come.

After the matter had been presented to the City Council in 1876, and its necessity urged, that body took prompt action, by the appointing of a committee of its members, to work in conjunction with the Workhouse Board, in selecting a farm for House of Refuge purposes. When the work of such joint committee was about completed and ready for presentation to the City Council, the spring election occurred, the Council was changed, by new members coming in and older ones going out, and like all new city councils, came in to practice the most rigid economy, and the whole Refuge project failed, and the farm was not purchased, nor the Refuge removed.

The necessity exists to-day as strong as ever, appealing for more ample grounds and buildings. If it were possible, in a

few lines, to say all that has been said in the past on this important matter, and to so emphasize these utterances as that they might materialize, and produce early fruit, in the purchase of a farm, and the erection of buildings, upon the cottage, or family plan, we should feel then, that a great and important work had been accomplished. Looking to the reformation of the wayward and vicious youth of the city, "Who are her wards," such a consummation should, and doubtless would, merit the hearty approval of the philanthropist and Christian, the citizen and the tax-payer.

If this project is to be considered only as a financial adventure, as a matter of dollars and cents, then there is not much hope of an early investment, for an enterprise of such magnitude, will cost for the plant, farm buildings and equipments, not less than *one hundred thousand dollars*, and the annual current expense thereafter, much beyond the cost of maintaining the Refuge as now situated.

But there are other and higher considerations involved, than merely the outlay of money. The moral welfare, for all time, of these children, for whom the city is responsible, is the important question to decide. If they are to be saved from degradation and ruin, here and hereafter, they must be disciplined, educated and reformed.

HEALTH.

Both departments of this institution have been unusually favored throughout the year, with good health, though in such a gathering as is found here, coming from vagrancy, filthiness, self abuse, and all manner of vice, it is not strange that the calls upon the physician are many and frequent.

In the Workhouse, two deaths have occurred, both from consumption, and sick when received. In the House of Refuge there has been no death, and but one boy was ordered to the hospital during the year. These statements are the more apparent, from the fact that the population of the House has been greater than for several years past.

This condition is attributable to the care and skill of the

physician, Dr. P. H. Sawyer, and his hearty co-operation with those in charge, in securing the best possible sanitary regulations and results, together with the change made late in the year 1882, in removing the boys from their old dining hall, in the prison, to a new and commodious dining-room, with abundance of light and air, and a more varied and judicious dietary of vegetables. In fact, the health of the departments has never been better since the opening of the House, nor has the food for the whole institution ever been so good and abundant as in the past year.

RELIGIOUS.

The chapel has been regularly occupied on the Sabbath day, by ministers of various denominations, serving a month each at a time, upon our invitation. These services are conducted at 3 P. M. A Catholic clergyman has also conducted services regularly once in two weeks, at 9 A. M. All the prisoners are expected and required to be present at all these services, unless excused because of any conscientious convictions they may have in regard to the same.

Many Christian ladies from the city have visited the female prisoners at stated times, to hold religious conversation with them, and to point out to them "the better way."

The Refuge schools have been gladdened many times, and made joyous by visits of Christian friends, by donations of papers and periodicals suited to their years, and also baskets of apples, grapes, oranges, etc., in their season.

On Thanksgiving day and Christmas, the whole house was furnished a substantial turkey dinner, supplemented with apples, cakes, cranberries, etc., to which all did ample justice, *if not to themselves.*

Christmas day, the children had in addition furnished them many articles of comfort and convenience, as presents, such as handkerchiefs, gloves, sleds and combs, and the girls dress material, hosiery, &c., &c. All for the occasion at least appeared happy. On this occasion the Superintendent was joined by the Catholic Central Association in furnishing many of the articles provided for the children.

In all the blessings of the past year that we as a great family have enjoyed, we recognize the hand of the Giver of all Good.

And for valuable and opportune counsel and aid, and uniform kindness that has been shown us by the Board of Directors, as a Board and as individuals, we make grateful acknowledgments.

Most Respectfully Submitted,

W. D. PATTERSON,

Superintendent.

HOSPITAL DEPARTMENT.

HOSPITAL DEPARTMENT.

To the Honorable Board of Directors of the Workhouse and House of Correction, Cleveland, Ohio:

GENTLEMEN:—I am gratified to be able to make a favorable report on the mortality, health and sanitary condition of the institution under your care. But two deaths have occurred during the year—John Syltan, of consumption, on the twenty-fifth day of June; and James McGuire, of pulmonary hemorrhage, on the eighth day of August. Received as vagrants, both were in the last stages of consumption at the time of their admittance.

There has been an entire absence of acute infectious diseases; not a case of erysipelas, typhoid fever, scarlet fever, diphtheria, or of dysentery that could be regarded as infectious. Scurvy was prevented by the Superintendent supplying the prisoners with fresh vegetables early in the season.

It may not be amiss to state that the building of the ice house has proven a sanitary measure of very great importance, as in it, food purchased in large quantities may be kept fresh and wholesome until distributed. Great care has been taken to reap the full benefit of this improvement by furnishing to the prisoners perfectly wholesome food in greater variety than would otherwise be possible.

In every respect the sanitary condition has been excellent. This is especially true of the Refuge Department. The absence of deaths, the healthful appearance of the children, and their rapid recoveries from illness testify strongly to this fact.

During the year I have made two hundred and seven visits; have prescribed for eight hundred and fifty-three patients, of whom six hundred and thirty-seven were males, and two hundred and sixteen females; and have made twelve hundred and eighty-three prescriptions. The number prescribed for is greater than last year, but the comparatively few prescriptions and the low rate of mortality show the transient nature of the ailments.

The department has been supplied with trusses, rubber and suspensory bandages, so that in many cases we have been able to afford prompt relief, and in some effect cures otherwise unobtainable. The expenses in this department are lower than ever before.

I am again under obligations to the Board, the Superintendent, and all officers of the prison for full co-operation and uniform courtesy.

Respectfully submitted,

P. H. SAWYER, M. D.,

Physician in charge.

ANNUAL REPORT

OF THE

INFIRMARY DEPARTMENT

OF THE

CITY OF CLEVELAND,

FOR THE YEAR ENDING DECEMBER 31, 1883.

Infirmary Department.

1888.

DIRECTORS.

BOLIVAR BUTTS, PRESIDENT.

EDWARD MOLONY.

JUDGE EDW. HESSENMUELLER.

CHARLES C. BURNETT.

WM. J. MCKINNIE.

CLERK OF THE BOARD,

L. S. O'NEIL,

SUPERINTENDENT.

L. F. MELLEN.

*To the Honorable Mayor and City Council }
of the City of Cleveland.*

GENTLEMEN:—Herewith find the Annual Report of the Superintendent of the Infirmary Department, for the year ending December 31, 1883.

Respectfully submitted,

BY ORDER OF THE BOARD OF INFIRMARY DIRECTORS.

ANNUAL REPORT

OF THE

SUPERINTENDENT OF THE INFIRMARY DEPARTMENT.

How best to care for the poor of the city is an important question. It requires a judicious, economical administration of the public funds so as to help a large class of the needy poor, without creating an unnecessary demand for relief. Indiscriminate giving tends to encourage applications, and among the poor and improvident of our large cities, it is easy to create a class of persons who think they must get their support by public or private charities. A system of investigation is absolutely necessary, in order to develop all the facts of the condition and circumstances of the applicants.

The most practical methods that can be adopted, is an effort to *put the poor in a way to support themselves*, as far as possible. If they are sick, give them the best hospital care and heal them. If they are able to work, provide them something to do to earn a livelihood. These are the principles upon which the Infirmary Department is now acting, as far as it has the means.

The Annual Report shows an increase in the number of persons and families that have been aided during the past year over and above the previous year, and yet the amount of money expended aside from repairs and improvements at the Infirmary has been increased but little. The Report is very complete in detailed statements of the work that has been done during the year.

THE INFIRMARY,

The interior of which was in a poor condition a year ago, has been almost entirely renovated, enlarged and improved at a small cost, and with additional furniture and appliances, it is now in first-class condition. The sick and the poor have plenty of good food, carefully prepared for each department in accordance with its needs, and provision made for the safety, comfort and happiness of its inmates. These improvements and changes are indicated in the statement of articles furnished for each department. Much of the work has been done by help that were paid in groceries, coal, &c., for the benefit of poor families, where they could not provide for themselves. The Infirmary receives a large number of visitors on Fridays, who express themselves as much pleased with the appearance and management of the institution. A new Library has been donated by different citizens, and a large amount of reading matter is furnished in the use of the files of papers which are contributed weekly, from the reading room of the Public Library.

THE HOSPITAL DEPARTMENT

Has increased its capacity by taking rooms formerly occupied by pauper inmates, not sick, and their number decreased by caring for them in "out door relief." Some improvements are needed for the Hospital, in ventilation, sewerage and heating, and with the "special diet" which we have inaugurated for that department, and its present good medical attendance, the sick can be as well cared for as at any place in the city. A light easy running ambulance should be purchased, and kept near the Superintendent's office in the City Hall, to be used exclusively for rapid transportation of the sick and injured to the Infirmary Hospital.

THE INSANE DEPARTMENT

Needs enlargement. It will be seen from this report that the number in that department has increased from 151 in the year ending December 31, 1882 to 187 in 1883. We are nearly to the limit of our capacity. Provision should be made this year to accommodate from 50 to 100 more insane. For some time to come all who become insane in Cuyahoga county, must be taken to the City Infirmary, or exchanged for an incurable case at the Lunatic Asylum.

The Cleveland Asylum for the Insane is full. Its capacity is rated at 600, but at the present time it has 637. The quota from this county is 159, it now has 183; so that when a person is found insane in this city or county, resident or non-resident, the Infirmary Department must take them in charge, and while we are constantly discharging from other departments of the Infirmary, most of the insane become a permanent charge. Already plans have been made to enlarge the dining rooms for the insane wards, but there should be an extension of 60 feet added to both the male and female insane buildings to furnish sleeping rooms.

The following is the annual statistical report of the

INFIRMARY DEPARTMENT.

	Males.	Females.	Total.

OUT DOOR RELIEF.

The increase of the City's population, depression in business, and lack of work with other causes, has made a large increase in the number of needy poor, during the past year over and above the previous year. The records that are kept in the Infirmary office, show nearly 1400 families who have been helped during the year, some continually every month, and some temporarily. These have all been investigated at their homes, and some have been found very destitute. Many as will be seen by the report are widows with large families others are reported as "husbands deserted them" and there have been an unusual number of "Assisted Emigrants." Where there is a man, in the family, husband, father, or son able to work, they

are refused help, except as they take a work order, and earn the supplies furnished. Fortunately in the building of a road at the Infirmary farm and other improvements we have been able to give poor men, out of work, employment, this winter, but in the future, with liability of many being unemployed during the winter months, if the City could arrange their system of public walks, cleaning streets, etc., so as to allow the Infirmary department to furnish help to be paid from the Infirmary store, it would be great economy to the City, and an advantage to the poor.

The following are the statistics of the Out Door Relief at the City Infirmary Office.

Number of families helped.....	1393
Number of persons in families.....	5184

NATIVITY OF FAMILIES.

United States.....	285
Ireland.....	483

ERIE STREET:

FRANK FINNEY.

MONROE STREET:

JOSEPH KROESEN.

HARVARD GROVE:

JOHN DIPLEY.

REPORT OF CEMETERY TRUSTEES.

To the Honorable the City Council of Cleveland. Ohio :

GENTLEMEN:—The Board of Cemetery Trustees respectfully submit their annual report for the year ending December 31, 1883, accompanied with the tabulated statements prepared by the secretary, with the request that the same be printed in pamphlet form.

Last spring, Trustee E. A. Scoville tendered his resignation as a member of the Board, and at the municipal election held in April, 1883, Mr. John Wagner was elected to fill the vacancy thus made, the term expiring in April, 1884.

The term of Trustee Jacob Meyer expired last April, and at the said municipal election, Mr. George Judson was elected for three years.

Messrs. Wagner and Judson having qualified, the Board organized by electing W. T. Dixon President, George Judson Treasurer, and H. E. Morrison Secretary.

During the year Woodland Cemetery was improved to the amount of \$7,806.22 in the erection of an iron fence on the north, east and west sides, and the laying out of six new sections.

Concerning the new sections, we are happy to state that considerable good taste is being displayed by the various lot owners in having broad spaces of green turf prevail, adorned

only with a noble family monument, and at proper intervals, suitable shade trees, and which, for simplicity, appropriateness and durability, form a striking contrast to some of the old sections, where head and foot stones, curbing, hedges and fences are huddled together in such profusion as to prevent the workmen from keeping them in the same good order as the former.

Such lots as there are in the new sections, blending the elegance of a park with the pensive beauty of a burial place, confer on the whole a grace and dignity which can never be attained in situations where every foot of ground is occupied with ornamental puerilities.

Considering the fact that our cemeteries this year have been officered with a new set of officials, it is with pleasure we state to your honorable body that the expense of transacting the business we have done shows very favorable in a comparison with that of former years; and we take this opportunity to tender thanks to those officials and others connected with us in the management of the several city cemeteries, for the efficient manner in which they have performed their respective duties.

In conclusion, we would say that in our experience we find that there were irregularities in both Monroe Street and Woodland Cemeteries.

Respectfully submitted.

W. T. DIXON.
GEO. JUDSON,
JOHN WAGNER,
Cemetery Trustees.

H. E. MORRISON, *Secretary.*

The interments during the year have been as follows:

CEMETERIES.	ADULTS.		MINORS.		Grand Total.
	Male.	Female	Male.	Female	
Woodland Avenue.....	244	242	303	231	1,040
Erie Street	42	45	78	67	232

TREASURER'S SUMMARY—Continued.

Amount to credit of fund arising from sale of lots and grave spaces	\$6,094 30
Amount received from City Auditor, levy of 1882.....	4,060 79
Received during the year from the sale of lots and grave spaces	13,017 44
Total	\$23,172 53
Amount taken from the fund arising from the sale of lots and grave spaces to pay pay-rolls and current expenses	\$4,498 36
Expended for improving and embellishing the cemeteries	7,806 22
Total	\$12,304 58
Balance to credit of fund January 1, 1884.....	\$10,867 95
Received during the year for services and vault fees.....	\$10,764 78
Received from the fund arising from the sale of lots and grave spaces.....	4,498 36
Total	\$15,263 14
Amount of running expenses during the year.....	\$15,263 14
Amount received for services and vault fees	10,764 78
Amount taken from the fund arising from the sale of lots and grave spaces.....	\$4,498 36

As will be seen from the foregoing statement, the running expenses (other than for improvements) of the several cemeteries are in excess of the receipts for services and vault fees, which receipts constitute the fund from which the running expenses should be paid.

This has been the case for years past, and consequently the fund derived from the sale of lots and grave spaces has been used to make up the deficiency. By using this fund as above stated, the cemeteries have been self-sustaining, and will con-

tinue to be so long as there are desirable lots and grave spaces for sale.

The following table will show the excess of running expenses over receipts (applicable for the purpose) of the several cemeteries during the past year:

For Woodland Cemetery	\$2,335 48
For Erie Street Cemetery	1,177 90
For Monroe Street Cemetery	298 40
For Harvard Grove Cemetery	347 21
Amount expended for general bills	339 87

Total excess of expenses over receipts applicable for this purpose	\$4,498 86
--	------------

Respectfully submitted,

H. E. MORRISON, *Secretary.*
